Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for TCI002WL/C were all within QC limits.
Percent recoveries for TCI003WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recoveries for H661-05M/S were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

Samples 10H661-01 and 10H661-02 were diluted prior to analysis due to their turbidity.

Subject: Laboratory Report
Project: NWS SEAL BEACH, IR SITE 70.

Enclosed is the Laboratory report for samples received on 09/01/10.
The data reported relate only to samples listed below :

Sample ID	Control #	Col Date	Matrix	Analysis
IW-70-FSB229-P13	1018-01	09/01/10	WATER	DISSOLVED GAS
				VOLATILE ORGANICS BY GC/MS
				ORGANIC ACIDS BY IC
				TOTAL ORGANIC CARBON

The results are summarized on the following pages.

Please feel free to call if you have any questions concerning
these results.

Sincerely yours,

for

Caspar J. Pang
Laboratory Director

This report is confidential and intended solely for the use of the individual or entity to whom it is addressed. This report shall not be reproduced except in full or without the written approval of EMAX.

EMAX certifies that the results included in this report meet all NELAC requirements unless noted in the Case Narrative.

NOTICE: Turnaround time (TAT) for samples shall not begin until all discrepancies have been resolved. For samples received and accepted after 1400 hrs. TAT shall start at 0800 hrs the next business day. The client is responsible for all costs associated with sample disposal. Samples shall be disposed of as soon as practical (but not prior to 5 days [15 calendar days]) after issuance of analytical report unless a different sample disposal schedule is pre-arranged with EMAX. Disposal fee for samples defined by CA Title 22 as non-hazardous shall be $5.00 per sample. EMAX will return hazardous samples to the client at the client's expense unless directed otherwise by applicable statewide

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I018

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I018

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

One (1) water sample was received on 09/01/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
The sample was analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for VO05I11L/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
The sample was analyzed according to prescribed analytical procedures. Manual integration was applied to one analyte in sample I018-01 because of improper integration. Hence, the original chromatogram was retained with the initialed and dated corrected chromatogram. Manual integration was concurred by a secondary reviewer. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

VOLATILE ORGANIC INSTRUMENT PERFORMANCE CHECK
BROMOFLUOROBENZENE (BFB)

Lab Name: EMAX Inc
Lab Code: EMXT Case No.:
Lab File ID: RIQ220
Instrument ID: TQ05
GC Column:RTX502.2ID:0.32mm (mm)

Contract: NWS SEAL BEACH, IR SITE 70.
SAS No.: SDG No.: 101018
BFB Injection Date : 09/07/10
BFB Injection Time : 20:32
Heated Purge: (Y/N) N

m/e	ION ABUNDANCE CRITERIA	% RELATIVE ABUNDANCE
50	15.0 - 40.0% of mass 95	18.21
75	30.0 - 60.0% of mass 95	41.84
95	Base peak, 100% relative abundance	100.00
96	5.0 - 9.0% of mass 95	6.82
173	Less than 2.0% of mass 174	0.00(0.0)1
174	Greater than 50% of mass 95	73.50
175	5.0 - 9.0% of mass 174	5.47(7.4)1
176	95.0 - 101.0% of mass 174	70.86(96.4)1
177	5.0 - 9.0% of mass 176	4.61(6.5)2

1-value is % mass 174 2-value is % mass 176

THIS CHECK APPLIES TO THE FOLLOWING SAMPLES, MS, MSD,BLANKS, AND STANDARDS:

	EPA SAMPLE NO.	LAB SAMPLE ID	LAB FILE ID	DATE ANALYZED	TIME ANALYZED

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD RSK-175
DISSOLVED GASES

SDG#: 10I018

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I018

METHOD RSK-175
DISSOLVED GASES

One(1) water sample was received on 09/01/10 for Dissolved Gas analysis, Method RSK-175 in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
The sample was analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method and was verified using a secondary source (ICV). All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for DGI008WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Sample Analysis
The sample was analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

METHOD SM5310B
TOC

One(1) water sample was received on 09/01/10 for Total Organic Carbon analysis, Method SM5310B in accordance with Standard Methods for the Examination of Water and Wastewater, 18th Edition.

Holding Time
The sample was analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG. Percent recoveries for TCI001WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
The sample was analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I018

METHOD 300.0(M)
ORGANICS BY IC

One (1) water sample was received on 09/01/10 for (Acetate, Butyrate, Lactate and Propionate) Organic Acids by IC analysis, Method 300.0(M) in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
The sample was analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for HCI008WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recoveries for I018-01M/S were within project QC limits.

Sample Analysis
The sample was analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

ANALYTICAL LOGS

EMAX LABORATORIES, INC.

ANALYSIS RUN LOG *for* ION CHROMATOGRAPHY

Note: For samples and relevant QCs/Standards analyzed, refer to attached analytical sequence.

Comments:

NaOH: SW9A - 02 013

HCT008W: H344, H661, T008, T019, T043 & T018

HCT010W: H630.

* Sequence run got interrupted due to no eluent. @ H310.049 (51) a.k. 09/10/10
H310.046 -- H310.049 (51) : Re-run all samples. a.k. 09/10/10

NOTICE: Turn around time (TAT) for samples will begin only as discrepancies have been resolved. For samples received and discrepancies resolved after 1500 hrs. TAT will start at 0700 hrs the next business day. The client is responsible for all cost associated with sample disposal. Samples shall be disposed of as soon as practical (but not prior to fifteen (15) calendar days) after issuance of analytical report unless a different sample disposal schedule is pre-arranged with EMAX. Disposal fee for samples defined by CA Title 22 as non-hazardous shall be $5.00 per sample. EMAX will return hazardous samples to the client at the client's expense unless directed in writing otherwise.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I019

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I019

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

A total of five (5) water samples were received on 09/01/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for VO05I11L/C were all within QC limits.
Percent recoveries for VO05I12L/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. Manual integration was applied to some analytes in sample I019-01 because of improper integration. Hence, the original chromatogram was retained with the initialed and dated corrected chromatogram. Manual integrations were concurred by a secondary reviewer. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

IS1 (DFB) = 1,4-Difluorobenzene
IS2 (CBZ) = Chlorobenzene-d5
IS3 (DCB) = 1,2-Dichlorobenzene-d4

AREA UPPER LIMIT = + 100% of internal standard area
AREA LOWER LIMIT = - 50% of internal standard area
AREA UPPER LIMIT = + 50% of surrogate area
AREA LOWER LIMIT = - 50% of surrogate area

Column used to flag internal standard area values with an asterisk
* Values outside of QC limits.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD RSK-175
DISSOLVED GASES

SDG#: 10I019

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I019

METHOD RSK-175
DISSOLVED GASES

A total of four (4) water samples were received on 09/01/10 for Dissolved Gas analysis, Method RSK-175 in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method and was verified using a secondary source (ICV). All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for DGI004WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LAB CHRONICLE
DISSOLVED GASES

Client : INSIGHT EEC, INC.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

SDG#: 10I019

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I019

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

A total of three (3) water samples were received on 09/01/10 for Dissolved Metals by ICP analysis, Method 3010A/6010B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Initial Calibration was established as prescribed by the method and was verified using a secondary source. Interference checks were performed and results were within required limits. Continuing calibration verifications and continuing calibration blanks were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for IPI045WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG. Analytical spike and serial dilution were analyzed for matrix interference evaluation. Results were within method acceptance criteria.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

WET CHEMICAL ANALYSES

SDG#: 10I019

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I019

METHOD 300.0
ANIONS BY IC

A total of four (4) water samples were received on 09/01/10 for Anions (Bromide, Chloride, Nitrate-N, Nitrite-N and Sulfate) by IC analysis, Method 300.0 in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, three (3) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Three (3) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for ICI005WX/C were all within QC limits.
Percent recoveries for ICI007WL/C were all within QC limits.
Percent recoveries for ICI013WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.
Sample I019-01 for Nitrate-N was initially analyzed at DF 5 due to matrix interference.
All samples were reported from dilution runs for Nitrite-N due to matrix interference from high Chloride level.

ANALYTICAL LOGS

EMAX LABORATORIES, INC.

ANALYSIS RUN LOG
for
ION CHROMATOGRAPHY

Note: For samples and relevant QCs/Standards analyzed, refer to attached analytical sequence.

Comments:

Concentrations of:

S1 — 0.1 ppm
S2 — 0.2 ppm
S3 — 0.5 ppm
S4 — 5.0 ppm
S5 — 10.0 ppm
S6 — 20.0 ppm
S7 — 25.0 ppm
S8 — 30.0 ppm

Linearity (ppm)

F^- — 10 ppm ✓
Cl^- — 30 ppm
NO_2N — 10 ppm ✓
Br^- — 10 ppm ✓
NO_3N — 30 ppm
PO_4P — 10 ppm ✓
SO_4^{2-} — 30 ppm

IC Eluent:

Stock-01-173 (320 mM Na_2CO_3/100 mM $NaHCO_3$) 20 mL
Stock-01-172 (100 mM $NaHCO_3$) 1 mL

IC Regenerant

Stock — 50 [illegible]

FINAL

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I019

METHOD 300.0(M)
ORGANICS BY IC

A total of four (4) water samples were received on 09/01/10 for Organic Acids (Acetate, Butyrate, Lactate and propionate) by IC analysis, Method 300.0(M) in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, four (4) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Four (4) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for HCI008WL/C were all within QC limits.
Percent recoveries for HCI012WL/C were all within QC limits.
Percent recoveries for HCI018WC/X were all within QC limits.
Percent recoveries for HCI022WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

Lactate was reported from 2x due to high concentration of Acetate.

ANALYTICAL LOGS

EMAX LABORATORIES, INC.

ANALYSIS RUN LOG
for
ION CHROMATOGRAPHY

Note: For samples and relevant QCs/Standards analyzed, refer to attached analytical sequence.

Comments:

Nodf: SW9A - 03 013

HC100BW : H444 , H661 , I008 , I019 , I043 & I018

HC1010W : H632

* Sequence run got interrupted due to no eluent. @ H110.044 (5) (0.0 ml/min) (0.2 ml/min)
H110.046 – H110.054 (0.0 ml/min) : Re-run all samples.

FINAL

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I019

METHOD 2320B
TOTAL ALKALINITY

A total of four (4) water samples were received on 09/01/10 for Alkalinity analysis, Method 2320B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for ALI003WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

for
ALKALINITY

Note: For samples and relevent QCs/Standards analyzed, refer to attached analytical sequence

Book#: AAL-028

Instrument No.: ☐ 53 ☐ 97 ☒ E5

Analytical Batch: 10E5I01

Analytical Sequence: ALI002; ALI003

Comments:

MS/MSD amount of spike: 0.4ml of SWP1-04-084 (10,000ppm) was spiked into samples for a final volume of 40ml.

Matrix recovery for sample I005-03 failed due to matrix interference. — will be re-analyzed

Method 2320B for SDG: I019

Calibration Report

Calibration Record # 209

Calibration Settings

Calibration ID	PH CAL 4-7-10	Date	09/03/2010	
Channel	1	Time	5:42 PM	
Probe Type	pH	Temperature	296.48 K	23.33 C
Probe ID	PH ELECTRODE	Analysis Type	Single Line Fit	

Calibration Results

Slope	-59.690	CorrCoeff	0.9999
Intercept	-2.317	Equation: Y = (-59.690) X + (-2.317)	

Calibration Validity **True** Operator

	Result	Minimum	Maximum
Slope	-59.690	-65.00	-53.00
Intercept	-2.317	-40.00	40.00
Correlation Coefficient	0.9999	0.99	1.00

Note: "True" means the calibration was within the specified ranges
"False" means the calibration was NOT within the specified ranges

Calibration Data	**Standard**	**Reading**
	4.00	177.85
	7.00	-4.51
	10.00	-180.29

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I019

METHOD 2540C
TOTAL DISSOLVED SOLIDS

A total of four (4) water samples were received on 09/01/10 for Total Dissolved Solids analysis, Method 2540C in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Balance calibration was checked as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for TDI003WL/C were all within QC limits.

Matrix QC Sample
Sample duplicate was analyzed with the samples in this SDG. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I019

METHOD 4500F
DISSOLVED HYDROGEN SULFIDE

A total of three (3) water samples were received on 09/01/10 for Dissolved Hydrogen Sulfide analysis, Method 4500F in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I019

METHOD SM5310B
TOC

A total of four (4) water samples were received on 09/01/10 for Total Organic Carbon analysis, Method SM5310B in accordance with Standard Methods for the Examination of Water and Wastewater, 18th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for TCI001WL/C were all within QC limits.
Percent recoveries for TCI003WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.
Sample I019-01 was diluted prior to analysis due to its turbidity.

NOTICE: Turnaround time (TAT) for samples shall not begin until all discrepancies have been resolved. For samples received and discrepancies resolved after 3:00 p.m. TAT shall commence on the next business day. The client is responsible for all cost associated with sample disposal. Samples shall be disposed of as soon as practical (but not prior to fifteen (15) calendar days) after issuance of analytical report unless a different sample disposal schedule is pre-arranged. If EMAX disposes of hazardous as defined by CA Title 22 or non-hazardous shall be $5.00 per sample. EMAX will return hazardous samples to the client at the client's expense unless directed otherwise.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I043

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I043

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

A total of six (6) water samples were received on 09/02/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for VO05I11L/C were all within QC limits.
Percent recoveries for VO05I12L/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. Manual integration was applied to some analytes in samples I043-01R and -02R because of improper integration. Hence, the original chromatograms were retained with the initialed and dated corrected chromatograms. Manual integrations were concurred by a secondary reviewer. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

m/e	ION ABUNDANCE CRITERIA	% RELATIVE ABUNDANCE
50	15.0 - 40.0% of mass 95	18.44
75	30.0 - 60.0% of mass 95	44.56
95	Base peak, 100% relative abundance	100.00
96	5.0 - 9.0% of mass 95	7.09
173	Less than 2.0% of mass 174	0.00(0.0)1
174	Greater than 50% of mass 95	71.79
175	5.0 - 9.0% of mass 174	5.44(7.6)1
176	95.0 - 101.0% of mass 174	71.48(99.6)1
177	5.0 - 9.0% of mass 176	4.77(6.7)2

1-Value is % mass 174 2-Value is % mass 176

THIS CHECK APPLIES TO THE FOLLOWING SAMPLES, MS, MSD,BLANKS, AND STANDARDS:

	EPA SAMPLE NO.	LAB SAMPLE ID	LAB FILE ID	DATE ANALYZED	TIME ANALYZED

VOLATILE ORGANIC INSTRUMENT PERFORMANCE CHECK
BROMOFLUOROBENZENE (BFB)

Lab Name: EMAX Inc
Lab Code: EMXT Case No.:
Lab File ID: RIQ220
Instrument ID: T005
GC Column:RTX502.2ID:0.32mm (mm)

Contract: NWS SEAL BEACH, IR SITE 70.
SAS No.: SDG No.: 101043
BFB Injection Date : 09/07/10
BFB Injection Time : 20:32
Heated Purge: (Y/N) N

m/e	ION ABUNDANCE CRITERIA	% RELATIVE ABUNDANCE
50	15.0 - 40.0% of mass 95	18.21
75	30.0 - 60.0% of mass 95	41.84
95	Base peak, 100% relative abundance	100.00
96	5.0 - 9.0% of mass 95	6.82
173	Less than 2.0% of mass 174	0.00(0.0)1
174	Greater than 50% of mass 95	73.50
175	5.0 - 9.0% of mass 174	5.47(7.4)1
176	95.0 - 101.0% of mass 174	70.86(96.4)1
177	5.0 - 9.0% of mass 176	4.61(6.5)2

1-Value is % mass 174 2-Value is % mass 176

VOLATILE INTERNAL STANDARD AREA AND RT SUMMARY

Lab Name: EMAX Inc
Lab Code: EMXT
Lab File ID: RH0642
Instrument ID: T005
GC Column: RTX502.2 ID: 0.32mm (mm)

Project: NWS SEAL BEACH, IR SITE 70.
SDG No.: 101043
Date Analyzed: 08/20/10
Time Analyzed: 20:13
Heated Purge: (Y/N) N

	IS1(DFB)		IS2(CBZ)		IS3(DCB)	
	AREA #	RT #	AREA #	RT #	AREA #	RT #

IS1 (DFB) = 1,4-Difluorobenzene
IS2 (CBZ) = Chlorobenzene-d5
IS3 (DCB) = 1,2-Dichlorobenzene-d4

AREA UPPER LIMIT = + 100% of internal standard area
AREA LOWER LIMIT = - 50% of internal standard area
AREA UPPER LIMIT = + 50% of surrogate area
AREA LOWER LIMIT = - 50% of surrogate area

Column used to flag internal standard area values with an asterisk
* Values outside of QC limits.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD RSK-175
DISSOLVED GASES

SDG#: 10I043

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I043

METHOD RSK-175
DISSOLVED GASES

A total of five (5) water samples were received on 09/02/10 for Dissolved Gas analysis, Method RSK-175 in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method and was verified using a secondary source (ICV). All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for DGI008WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LAB CHRONICLE
DISSOLVED GASES

Client : INSIGHT EEC, INC. SDG NO. : 101043
Project : NWS SEAL BEACH, IR SITE 70. Instrument ID : GC1310

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I066

METHOD 2320B
TOTAL ALKALINITY

A total of six (6) water samples were received on 09/03/10 for Alkalinity analysis, Method 2320B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A Lab Control Sample was analyzed with the samples in this SDG.
Percent recovery for ALI011WL was within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG. However, sample duplicate was analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I066

METHOD 2540C
TOTAL DISSOLVED SOLIDS

A total of six (6) water samples were received on 09/03/10 for Total Dissolved Solids analysis, Method 2540C in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Balance calibration was checked as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for TDI004WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I066

METHOD 4500F
DISSOLVED HYDROGEN SULFIDE

A total of three (3) water samples were received on 09/03/10 for Dissolved Hydrogen Sulfide analysis, Method 4500F in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I066

METHOD SM5310B
TOC

A total of six (6) water samples were received on 09/03/10 for Total Organic Carbon analysis, Method SM5310B in accordance with Standard Methods for the Examination of Water and Wastewater, 18th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for TCI003WL/C were all within QC limits.
Percent recoveries for TCI007WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.
Samples I066-01 and -02 were diluted prior to analysis due to strong odor.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

SDG#: 10I043

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I043

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

A total of four (4) water samples were received on 09/02/10 for Dissolved Metals by ICP analysis, Method 3010A/6010B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Initial Calibration was established as prescribed by the method and was verified using a secondary source. Interference checks were performed and results were within required limits. Continuing calibration verifications and continuing calibration blanks were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for IPI045WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG. Analytical spike and serial dilution were analyzed for matrix interference evaluation. Results were within method acceptance criteria.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

WET CHEMICAL ANALYSES

SDG#: 10I043

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I043

METHOD 300.0
ANIONS BY IC

A total of five (5) water samples were received on 09/02/10 for Anions (Bromide, Chloride, Nitrate-N, Nitrite-N and Sulfate) by IC analysis, Method 300.0 in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for ICI009WL/C were all within QC limits.
Percent recoveries for ICI011WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

Sample I043-02 was initially analyzed at 2x dilution due to the orange color except for Chloride.

Sample I043-01 for Nitrite-N was reported from 2x dilution due to the Chloride interference.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I043

METHOD 300.0(M)
ORGANICS BY IC

A total of five (5) water samples were received on 09/02/10 for Organic Acids (Acetate, Butyrate, Lactate and Propionate) by IC analysis, Method 300.0(M) in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for HCI008WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

FINAL

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I043

METHOD 2320B
TOTAL ALKALINITY

A total of five (5) water samples were received on 09/02/10 for Alkalinity analysis, Method 2320B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for ALI008WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I043

METHOD 2540C
TOTAL DISSOLVED SOLIDS

A total of five (5) water samples were received on 09/02/10 for Total Dissolved Solids analysis, Method 2540C in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Balance calibration was checked as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for TDI003WL/C were all within QC limits.

Matrix QC Sample
Sample duplicate was analyzed with the samples in this SDG. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 101043

METHOD 4500F
DISSOLVED HYDROGEN SULFIDE

A total of four (4) water samples were received on 09/02/10 for Dissolved Hydrogen Sulfide analysis, Method 4500F in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time:
Samples were analyzed within the prescribed holding time.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

METHOD 4500F
Dissolved Hydrogen Sulfide

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I043

METHOD SM5310B
TOC

A total of five (5) water samples were received on 09/02/10 for Total Organic Carbon analysis, Method SM5310B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for TCI003WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

Subject: Laboratory Report
Project: NWS SEAL BEACH, IR SITE 70.

Enclosed is the Laboratory report for samples received on 09/03/10.
The data reported relate only to samples listed below :

Sample ID	Control #	Col Date	Matrix	Analysis
T-10M	1065-01	09/03/10	WATER	METALS CAM MERCURY

The results are summarized on the following pages.

Please feel free to call if you have any questions concerning these results.

Sincerely yours,

for

Cuspar J. Pang
Laboratory Director

NOTICE: Turnaround time (TAT) for samples shall not begin until all discrepancies have been resolved. For samples received and discrepancies resolved after 1500 hrs, TAT shall start at 0800 hrs the next business day. The client is responsible for all cost associated with sample disposal. Samples shall be disposed of as soon as practical (but not prior to fifteen (15) calendar days) after issuance of analytical report unless a different sample disposal schedule is agreed upon with EMAX. Disposal fee for samples defined by CA Title 22 as non-hazardous shall be $5.00 per sample. EMAX will return hazardous samples to the client at the client's expense, unless directed in writing otherwise.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level
E	J	Indicates that the result is above the maximum calibration range
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METALS / MERCURY

SDG#: 10I065

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I065

METHOD 3010A/6010B
METALS BY TRACE ICP

One (1) water sample was received on 09/03/10 for Metals CAM analysis, Method 3010A/6010B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
The sample was analyzed within the prescribed holding time.

Calibration
Initial Calibration was established as prescribed by the method and was verified using a secondary source. Interference checks were performed and results were within required limits. Continuing calibration verifications and continuing calibration blanks were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for IPI028WX/Y were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recoveries were within project QC limits except for one result qualified with [*] in I065-01 M/S summary form, most likely due to matrix interference.
Check QC summary form for details.
In addition, analytical spike and serial dilution were analyzed for matrix interference evaluation. Results were within method acceptance criteria.

Sample Analysis
The sample was analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I065

METHOD 7470A
MERCURY BY COLD VAPOR

One (1) water sample was received on 09/03/10 for Mercury analysis, Method 7470A in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
The sample was analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for HGI005WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG. Analytical spike and serial dilution were analyzed for matrix interference evaluation. Results were within method acceptance criteria.

Sample Analysis
The sample was analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LAB CHRONICLE
MERCURY BY COLD VAPOR

Client : INSIGHT EEC, INC.
Project : NWS SEAL BEACH, IR SITE 70.

				DISSOLVED HYDROGEN SULFIDE
TB-09/03/10	1066-07	09/03/10	WATER	VOLATILE ORGANICS BY GC/MS

The results are summarized on the following pages.

Please feel free to call if you have any questions concerning these results.

Sincerely yours,

for

Caspar J. Pang
Laboratory Director

This report is confidential and intended solely for the use of the individual or entity to whom it is addressed. This report shall not be reproduced except in full or without the written approval of EMAX.

EMAX certifies that the results included in this report meet all NELAC requirements unless noted in the Case Narrative.

NOTICE: Turnaround time (TAT) for samples shall not begin until all discrepancies have been resolved. For samples received and discrepancies resolved after 1500 hrs, TAT shall start at 0900 hrs the next business day. The client is responsible for all cost associated with sample disposal. Samples shall be disposed of as soon as practical (but not prior to 5 business days) after issuance of analytical report unless a different sample disposal schedule is pre-arranged with EMAX. Disposal fee for samples defined by CA Title 22 as non-hazardous shall be $5.00 per sample. EMAX will return hazardous samples to the client at the client's expense unless directed in writing otherwise.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I066

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I066

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

A total of seven (7) water samples were received on 09/03/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, four (4) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Four (4) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for VO05I12L/C were all within QC limits.
Percent recoveries for VO06I11L/C were all within QC limits.
Percent recoveries for VO06I12L/C were all within QC limits.
Percent recoveries for VO06I19L/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. Manual integration was applied to some analytes in samples I066-01R, -02R, -03R and -04 because of improper integration. Hence, the original chromatograms were retained with the initialed and dated corrected chromatograms. Manual integrations were concurred by a secondary reviewer. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

VOLATILE ORGANIC INSTRUMENT PERFORMANCE CHECK
BROMOFLUOROBENZENE (BFB)

Lab Name: EMAX Inc
Lab Code: EMXT Case No.:
Lab File ID: RIQ238
Instrument ID: TQ05
GC Column:RTX502.2ID:0.32mm (mm)

Contract: NWS SEAL BEACH, IR SITE 70.
SAS No.: SDG No.: I0I066
BFB Injection Date : 09/08/10
BFB Injection Time : 15:10
Heated Purge: (Y/N) N

m/e	ION ABUNDANCE CRITERIA	% RELATIVE ABUNDANCE
50	15.0 - 40.0% of mass 95	17.99
75	30.0 - 60.0% of mass 95	42.40
95	Base peak, 100% relative abundance	100.00
96	5.0 - 9.0% of mass 95	6.52
173	Less than 2.0% of mass 174	0.00(0.0)1
174	Greater than 50% of mass 95	75.56
175	5.0 - 9.0% of mass 174	5.66(7.5)1
176	95.0 - 101.0% of mass 174	71.90(95.4)1
177	5.0 - 9.0% of mass 176	4.66(6.5)2

1-Value is % mass 174 2-Value is % mass 176

FORM V VOA OLM02.0

BA
VOLATILE INTERNAL STANDARD AREA AND RT SUMMARY

Lab Name: EMAX Inc
Lab Code: EMXT
Lab File ID: RH0642
Instrument ID: T005
GC Column: RTX502.2 ID: 0.32mm (mm)

Project: NWS SEAL BEACH, IR SITE 70.
SDG No.: 101060
Date Analyzed: 08/20/10
Time Analyzed: 20:13
Heated Purge: (Y/N) N

		IS1(DFB)		IS2(CBZ)		IS3(DCB)	
		AREA #	RT #	AREA #	RT #	AREA #	RT #

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD RSK-175
DISSOLVED GASES

SDG#: 10I066

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I066

METHOD RSK-175
DISSOLVED GASES

A total of six (6) water samples were received on 09/03/10 for Dissolved Gas analysis, Method RSK-175 in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method and was verified using a secondary source (ICV). All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for DGI009WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

SDG#: 10I066

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I066

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

A total of three (3) water samples were received on 09/03/10 for Dissolved Metals by ICP analysis, Method 3010A/6010B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Initial Calibration was established as prescribed by the method and was verified using a secondary source. Interference checks were performed and results were within required limits. Continuing calibration verifications and continuing calibration blanks were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for IPI062WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG. Analytical spike and serial dilution were analyzed for matrix interference evaluation.
Results were within method acceptance criteria.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

WET CHEMICAL ANALYSES

SDG#: 10I066

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I066

METHOD 300.0
ANIONS BY IC

A total of six (6) water samples were received on 09/03/10 for Anions (Bromide, Chloride, Nitrate-N, Nitrite-N and Sulfate) by IC analysis, Method 300.0 in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. Results were compliant to project requirement.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for ICI011WL/C were all within QC limits.
Percent recoveries for ICI017WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.
Samples I066-01, -02, -03 and -06 for Bromide, Nitrate-N and Nitrite-N were initially analyzed at 2x due to strong odor.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I066

METHOD 300.0(M)
ORGANIC ACIDS BY IC

A total of six (6) water samples were received on 09/03/10 for Organic Acids (Acetate, Butyrate, Lactate and Propionate) by IC analysis, Method 300.0(M) in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, three (3) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Three (3) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for HCI016WL/C were all within QC limits.
Percent recoveries for HCI018WX/C were all within QC limits.
Percent recoveries for HCI026WX/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

NOTICE: Turn-around-time (TAT) for samples shall not begin until all discrepancies have been resolved. For samples received and discrepancies resolved after 1500 hrs, TAT shall start at 0800 hrs the next business day. The client is responsible for all cost associated with sample disposal. Samples shall be disposed of as soon as practical (but not prior to fifteen (15) calendar days) after issuance of analytical report unless a different sample disposal schedule is pre-arranged with EMAX. Disposal fee for samples defined by CA Title 22 as non-hazardous shall be $5.00 per sample. EMAX will return hazardous samples to the client at the client's expense unless directed in writing otherwise.

C2	Broken container	G3	>20% solid particle		
C3	Leaking container	H1			
C4		H2			

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I075

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I075

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

A total of three (3) water samples were received on 09/07/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for VO94I06L/C were all within QC limits.
Percent recoveries for VO94I07L/C were all within QC limits.

Matrix QC Sample
A set of MS/MSD was analyzed with the samples in this SDG.
Percent recoveries for I075-02M/S were within project QC limits.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. Manual integration was applied to one analyte in samples I075-01 and 02 because of improper integration. Hence, the original chromatograms were retained with the initialed and dated corrected chromatograms. Manual integrations were concurred by a secondary reviewer. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

VOLATILE ORGANIC INSTRUMENT PERFORMANCE CHECK
BROMOFLUOROBENZENE (BFB)

Lab Name: EMAX Inc
Lab Code: EMXT Case No.:
Lab File ID: RH0314
Instrument ID: T094
GC Column: RTX502.2 ID: 0.32mm (mm)

Contract: NWS SEAL BEACH, IR SITE 70.
SAS No.: SDG No.: 10075
BFB Injection Date : 08/11/10
BFB Injection Time : 20:52
Heated Purge: (Y/N) N

m/e	ION ABUNDANCE CRITERIA	% RELATIVE ABUNDANCE
50	15.0 - 40.0% of mass 95	21.10
75	30.0 - 60.0% of mass 95	47.45
95	Base peak, 100% relative abundance	100.00
96	5.0 - 9.0% of mass 95	6.34
173	Less than 2.0% of mass 174	0.00(0.0)1
174	Greater than 50% of mass 95	78.44
175	5.0 - 9.0% of mass 174	5.92(7.5)1
176	95.0 - 101.0% of mass 174	76.27(97.2)1
177	5.0 - 9.0% of mass 176	4.78(6.3)2

1-Value is % mass 174 2-Value is % mass 176

THIS CHECK APPLIES TO THE FOLLOWING SAMPLES, MS, MSD, BLANKS, AND STANDARDS:

	EPA SAMPLE NO.	LAB SAMPLE ID	LAB FILE ID	DATE ANALYZED	TIME ANALYZED
1	VSTD0.3	V094H1101	RHD315	08/11/10	21:30

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD RSK-175
DISSOLVED GASES

SDG#: 10I075

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I075

METHOD RSK-175
DISSOLVED GASES

A total of two (2) water samples were received on 09/07/10 for Dissolved Gas analysis, Method RSK-175 in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method and was verified using a secondary source (ICV). All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for DGI010WL/C were all within QC limits.

Matrix QC Sample
A set of MS/MSD was analyzed with the samples in this SDG.
Percent recoveries for I075-02M/S were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LAB CHRONICLE
DISSOLVED GASES

Client : INSIGHT EEC, INC.
Project : NWS SEAL BEACH, IR SITE 70.

SDG NO. : 101075
Instrument ID : GCFD10

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

SDG#: 10I075

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I075

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

A total of two (2) water samples were received on 09/07/10 for Dissolved Metals by ICP analysis, Method 3010A/6010B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Initial Calibration was established as prescribed by the method and was verified using a secondary source. Interference checks were performed and results were within required limits. Continuing calibration verifications and continuing calibration blanks were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for IPI073WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recoveries for I075-02M/S were within project QC limits.
In addition, analytical spike and serial dilution were analyzed for matrix interference evaluation. Results were within method acceptance criteria.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

WET CHEMICAL ANALYSES

SDG#: 10I075

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I075

METHOD 300.0
ANIONS BY IC

A total of two (2) water samples were received on 09/07/10 for Anions (Bromide, Chloride, Nitrate-N, Nitrite-N and Sulfate) by IC analysis, Method 300.0 in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Two sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for ICI017WL/C were all within QC limits.
Percent recoveries for ICI019WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recoveries for I075-02M/S were within project QC limits.
Sample duplicate was also analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

FINAL

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I075

METHOD 300.0(M)
ORGANIC ACIDS BY IC

A total of two (2) water samples were received on 09/07/10 for Organic Acids (Acetate, Butyrate, Lactate and Propionate) by IC analysis, Method 300.0(M) in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for HCI016WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recovery for I075-02M was within project QC limits.
Sample duplicate was also analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I075

METHOD 2320B
TOTAL ALKALINITY

A total of two (2) water samples were received on 09/07/10 for Alkalinity analysis, Method 2320B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG. Percent recoveries for AL1008WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG. However, sample duplicate was analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 101075

METHOD 2540C
TOTAL DISSOLVED SOLIDS

A total of two (2) water samples were received on 09/07/10 for Total Dissolved Solids analysis, Method 2540C in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Balance calibration was checked as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/DCD was analyzed with the samples in this SDG.
Percent recoveries for TDI004WL/C were all within QC limits.

Matrix QC Sample
Sample duplicate was analyzed with the samples in this SDG. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT REC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 101075

METHOD 4500F
DISSOLVED HYDROGEN SULFIDE

A total of two (2) water samples were received on 09/07/10 for Dissolved Hydrogen Sulfide analysis, Method 4500F in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Matrix QC Sample
No matrix QC sample was designated for this SDG. However, sample duplicate was analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

Where: T(°K) = T(°C)+273.15; pK1=dissociation constant for zero ionic strength; A = Debye Hückel Parameter; I= Ionic Strength; pfm=negative logarithm of the monovalent ion activity coefficient; K'1= conditional ionization constant; H+ =Hydrogen ion concentration; ST=Total Sulfide Concentration

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I075

METHOD SM5310B
TOC

A total of two (2) water samples were received on 09/07/10 for Total Organic Carbon analysis, Method SM5310B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for TCI004WL/C were all within QC limits.
Percent recoveries for TCI005WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recoveries for I075-02M/S were within project QC limits.
Sample duplicate was also analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

NOTICE: Turn-around-time (TAT) for samples shall not begin until all discrepancies have been resolved. For samples received and discrepancies resolved after 1500 hrs, TAT shall start at 0800 hrs the next business day. The client is responsible for all costs associated with sample disposal. Samples shall be disposed of as soon as practical (not prior to 5 days (5 calendar days) after issuance of analytical report unless a different sample disposal schedule is pre-arranged with EMAX. Disposal fee for samples defined by CA Title 22 as non-hazardous shall be $5.00 per sample. EMAX will return hazardous samples to the client at the client's expense unless directed in writing otherwise.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I091

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I091

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

A total of six (6) water samples were received on 09/08/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for VO94I08L/C were all within QC limits.
Percent recoveries for VO94I10L/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. Manual integration was applied to one analyte in sample I091-01 because of improper integration. Hence, the original chromatogram was retained with the initialed and dated corrected chromatogram. Manual integration was concurred by a secondary reviewer. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.
