Heated Purge: (Y/N) N

m/e	ION ABUNDANCE CRITERIA	% RELATIVE ABUNDANCE
50	15.0 - 40.0% of mass 95	21.10
75	30.0 - 60.0% of mass 95	47.45
95	Base peak, 100% relative abundance	100.00
96	5.0 - 9.0% of mass 95	6.34
173	Less than 2.0% of mass 174	0.00(0.0)1
174	Greater than 50% of mass 95	78.44
175	5.0 - 9.0% of mass 174	5.92(7.5)1
176	95.0 - 101.0% of mass 174	76.27(97.2)1
177	5.0 - 9.0% of mass 176	4.78(6.3)2

1-Value is % mass 174 2-Value is % mass 176

THIS CHECK APPLIES TO THE FOLLOWING SAMPLES, MS, MSD,BLANKS, AND STANDARDS:

IS1 (DFB) = 1,4-Difluorobenzene
IS2 (CBZ) = Chlorobenzene-d5
IS3 (DCB) = 1,2-Dichlorobenzene-d4

AREA UPPER LIMIT = + 100% of internal standard area
AREA LOWER LIMIT = - 50% of internal standard area
AREA UPPER LIMIT = + 50% of surrogate area
AREA LOWER LIMIT = - 50% of surrogate area

Column used to flag internal standard area values with an asterisk
* Values outside of QC limits.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD RSK-175
DISSOLVED GASES

SDG#: 10I091

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I091

METHOD RSK-175
DISSOLVED GASES

A total of five (5) water samples were received on 09/08/10 for Dissolved Gas analysis, Method RSK-175 in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method and was verified using a secondary source (ICV). All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for DGI009WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LAB CHRONICLE
DISSOLVED GASES

Client : INSIGHT EEC, INC. SDG NO. : 1C1091
Project : NAS SEAL BEACH, IR SITE 70. Instrument ID : GCT010

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

SDG#: 10I091

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I091

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

A total of two (2) water samples were received on 09/08/10 for Dissolved Metals by ICP analysis, Method 3010A/6010B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Initial Calibration was established as prescribed by the method and was verified using a secondary source. Interference checks were performed and results were within required limits. Continuing calibration verifications and continuing calibration blanks were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for IPI073WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG. Analytical spike and serial dilution were analyzed for matrix interference evaluation. Results were within method acceptance criteria.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

WET CHEMICAL ANALYSES

SDG#: 10I091

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I091

METHOD 300.0
ANIONS BY IC

A total of four (4) water samples were received on 09/08/10 for Anions (Bromide, Chloride, Nitrate-N, Nitrite-N and Sulfate) by IC analysis, Method 300.0 in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Two sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for ICI019WL/C were all within QC limits.
Percent recoveries for ICI021WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.
Samples I091-02, -03 and -04 were initially analyzed at dilution due to strong odor and turbid appearance.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I091

METHOD 300.0(M)
ORGANIC ACIDS BY IC

A total of four (4) water samples were received on 09/08/10 for Organic Acids (Acetate, Butyrate, Lactate and Propionate by IC analysis, Method 300.0(M) in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for HCI016WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

FINAL

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I091

METHOD 2320B
TOTAL ALKALINITY

A total of four (4) water samples were received on 09/08/10 for Alkalinity analysis, Method 2320B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG. Percent recoveries for ALI010WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG. However, sample duplicate was analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I091

METHOD 2540C
TOTAL DISSOLVED SOLIDS

A total of four (4) water samples were received on 09/08/10 for Total Dissolved Solids analysis, Method 2540C in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Balance calibration was checked as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for TDI004WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I091

METHOD 4500F
DISSOLVED HYDROGEN SULFIDE

A total of two (2) water samples were received on 09/08/10 for Dissolved Hydrogen Sulfide analysis, Method 4500F in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

METHOD 4500F
Dissolved Hydrogen Sulfide

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I091

METHOD SM5310B
TOC

A total of four (4) water samples were received on 09/08/10 for Total Organic Carbon analysis, Method SM5310B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Two sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for TCI004WL/C were all within QC limits.
Percent recoveries for TCI005WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I148

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I148

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

A total of twelve (12) water samples were received on 09/10/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, four (4) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Four (4) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for VO94I10L/C were all within QC limits.
Percent recoveries for VO94I11L/Y were all within QC limits.
Percent recoveries for VO94I12L/C were all within QC limits.
Percent recoveries for VO94I13L/C were all within QC limits.

Matrix QC Sample
A set of MS/MSD was analyzed with the samples in this SDG.
Percent recoveries were within project QC limits except for results qualified with [*] in I148-06 M/S summary form, most likely due to matrix interference. Check QC summary form for details.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

TCE concentration in sample I148-03T and -07T were "J" flagged due to the project specific RL that is greater than EMAX RL. Although the values were detected below the project RL, they are supported by the calibration.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD RSK-175
DISSOLVED GASES

SDG#: 10I148

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I148

METHOD RSK-175
DISSOLVED GASES

A total of ten (10) water samples were received on 09/10/10 for Dissolved Gas analysis, Method RSK-175 in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method and was verified using a secondary source (ICV). All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for DGI012WL/C were all within QC limits.

Matrix QC Sample
A set of MS/MSD was analyzed with the samples in this SDG.
Percent recoveries for I148-06M/S were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LAB CHRONICLE
DISSOLVED GASES

Client : INSIGHT EEC, INC.
Project : NWS SEAL BEACH, IR SITE 70.

SDG NO. : 10F148
Instrument ID : GC1010

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

SDG#: 10I148

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I148

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

A total of four (4) water samples were received on 09/10/10 for Dissolved Metals by ICP analysis, Method 3010A/6010B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Initial Calibration was established as prescribed by the method and was verified using a secondary source. Interference checks were performed and results were within required limits. Continuing calibration verifications and continuing calibration blanks were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for IPI077WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project. Percent recoveries were within project QC limits except for Manganese result qualified with [*] in I148-01 M/S summary form, most likely due to low spiking level interference. Check QC summary form for details.
In addition, analytical spike and serial dilution were analyzed for matrix interference evaluation. Results were within method acceptance criteria.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.
Samples I148-01T and -01M/S were reported from dilution 5 due to matrix interference.

EMAX LABORATORIES, INC.

ANALYSIS RUN LOG
for
ICP

Note: For samples and relevant QCs/Standards analyzed, refer to attached analytical sequence.

Start Date: 9/28/10 15:30
End Date: 9/29/10 13:06

Book #: ADS-016
Instrument No.: D8
Analytical Batch: 1D8J029
Analytical Sequence: S_106010 (U41)
Method File: 106010 (U41)
Database: Emax12

SOP #	Rev. #
☑ EMAX-6010	5
☐ EMAX-6010C	0
☐ EMAX-200.7	1
☐ EMAX-	

Comments:
- 3461-01 → 04 Fe 210R
Fe is interfering element for several analytes
- 3364-05 Zn 210R

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

WET CHEMICAL ANALYSES

SDG#: 10I148

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 101148

METHOD 300.0
ANIONS BY IC

A total of four (4) water samples were received on 09/10/10 for Anions (Bromide, Chloride, Nitrate-N, Nitrite-N and Sulfate) by IC analysis, Method 300.0 in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, three (3) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Three (3) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for ICI025WL/C were all within QC limits.
Percent recoveries for ICI029WL/C were all within QC limits.
Percent recoveries for ICI033WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.
All samples were reported from dilution runs for Nitrite-N due to interference from high Chloride level.
Sample I148-01 was reported from dilution 20 for Nitrate-N due to interference from high Chloride level.

FINAL

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I148

METHOD 300.0(M)
ORGANIC ACIDS BY IC

A total of four (4) water samples were received on 09/10/10 for Organic Acids (Acetate, Butyrate, Lactate and Propionate) by IC analysis, Method 300.0(M) in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for HCI016WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I148

METHOD 2320B
TOTAL ALKALINITY

A total of four (4) water samples were received on 09/10/10 for Alkalinity analysis, Method 2320B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for ALI008WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

Calibration Record # 211

Calibration Settings

Calibration ID	PH CAL 4-7-10	Date	09/14/2010	
Channel	1	Time	6:07 PM	
Probe Type	pH	Temperature	296.82 K	23.67 C
Probe ID	PH ELECTRODE	Analysis Type	Single Line Fit	

Calibration Results

Slope	-59.630	CorrCoeff	1.0000
Intercept	-3.497	Equation: Y = (-59.630) X + (-3.497)	

Calibration Validity True Operator

	Result	Minimum	Maximum
Slope	-59.630	-65.00	-53.00
Intercept	-3.497	-40.00	40.00
Correlation Coefficient	1.0000	0.99	1.00

Note: "True" means the calibration was within the specified ranges
"False" means the calibration was NOT within the specified ranges

Calibration Data	Standard	Reading
	4.00	176.39
	7.00	-5.49
	10.00	-181.39

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10T148

METHOD 2540C
TOTAL DISSOLVED SOLIDS

A total of four (4) water samples were received on 09/10/10 for Total Dissolved Solids analysis, Method 2540C in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Balance calibration was checked as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for TDIC08WL/C were all within QC limits.
Percent recoveries for TDIC09WL/C were all within QC limits.

Matrix QC Sample
Sample duplicate was analyzed with the samples in this SDG. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT REC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 101148

METHOD SM5310B
TOC

A total of four (4) water samples were received on 09/10/10 for Total Organic Carbon analysis, Method SM5310B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for TCI007WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

METHOD SW5310B

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I148

METHOD 4500F
DISSOLVED HYDROGEN SULFIDE

A total of four (4) water samples were received on 09/10/10 for Dissolved Hydrogen Sulfide analysis, Method 4500F in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

METHOD 4500F

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I193

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I193

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

A total of nine (9) water samples were received on 09/14/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for VO94I12L/C were all within QC limits.
Percent recoveries for VO94I13L/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. Manual integration was applied to one analyte in sample I193-02 because of improper integration. Hence, the original chromatogram was retained with the initialed and dated corrected chromatogram. Manual integration was concurred by a secondary reviewer. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

50	15.0 - 40.0% of mass 95	21.10
75	30.0 - 60.0% of mass 95	47.45
95	Base peak, 100% relative abundance	100.00
96	5.0 - 9.0% of mass 95	6.34
173	Less than 2.0% of mass 174	0.00(0.0)1
174	Greater than 50% of mass 95	78.44
175	5.0 - 9.0% of mass 174	5.92(7.5)1
176	95.0 - 101.0% of mass 174	76.27(97.2)1
177	5.0 - 9.0% of mass 176	4.78(6.3)2

1-value is % mass 174 2-value is % mass 176

THIS CHECK APPLIES TO THE FOLLOWING SAMPLES, MS, MSD,BLANKS, AND STANDARDS:

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD RSK-175
DISSOLVED GASES

SDG#: 10I193

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I193

METHOD RSK-175
DISSOLVED GASES

A total of three (3) water samples were received on 09/14/10 for Dissolved Gas analysis, Method RSK-175 in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method and was verified using a secondary source (ICV). All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for DGI013WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LAB CHRONICLE
DISSOLVED GASES

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

WET CHEMICAL ANALYSES

SDG#: 10I193

8000

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I193

METHOD 300.0
ANIONS BY IC

A total of two (2) water samples were received on 09/14/10 for Anions (Bromide, Chloride, Nitrate-N, Nitrite-N and Sulfate) by IC analysis, Method 300.0 in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for ICI035WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.
Samples for Nitrite-N were reported from 5x dilution due to high concentration of Chloride.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I193

METHOD 300.0(M)
ORGANIC ACIDS BY IC

A total of two (2) water samples were received on 09/14/10 for Organic Acids (Acetate, Butyrate, Lactate and Propionate) by IC analysis, Method 300.0(M) in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for HCI016WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

FINAL

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I193

METHOD 2320B
TOTAL ALKALINITY

A total of two (2) water samples were received on 09/14/10 for Alkalinity analysis, Method 2320B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG. Percent recoveries for ALI013WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I193

METHOD 2540C
TOTAL DISSOLVED SOLIDS

A total of two (2) water samples were received on 09/14/10 for Total Dissolved Solids analysis, Method 2540C in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Balance calibration was checked as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for TDI008WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I193

METHOD SM5310B
TOC

A total of two (2) water samples were received on 09/14/10 for Total Organic Carbon analysis, Method SM5310B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for TCI007WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

NOTICE: Turn-around-time (TAT) for samples that not begin until all discrepancies have been resolved. For samples received and discrepancies resolved after 1500 hrs, TAT shall start at 0830 hrs the next business day. The client is responsible for all cost associated with sample disposal. Samples shall be disposed of as soon as practical (but not prior to fifteen (15) calendar days) after issuance of analytical report unless a different sample disposal schedule is pre-arranged with EMAX. Disposal fee for samples defined by CA Title 22 as non-hazardous shall be $3.00 per sample. EMAX will return hazardous samples to the client at the client's expense unless directed in writing otherwise.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I246

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I246

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

A total of eleven (11) water samples were received on 09/16/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, four (4) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Four (4) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for VO94I16L/C were all within QC limits.
Percent recoveries for VO94I17L/C were all within QC limits.
Percent recoveries for VO94I25X/C were all within QC limits.
Percent recoveries for VO94I26L/C were all within QC limits.

Matrix QC Sample
A set of MS/MSD was analyzed with the samples in this SDG.
Percent recoveries for I246-02M/S were within project QC limits.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. Manual integration was applied to Cis-1,2-Dichloroethene in samples I246-02, -02M/S, -03, -04 and -10 because of improper integration. Hence, the original chromatograms were retained with the initialed and dated corrected chromatograms. Manual integrations were concurred by a secondary reviewer. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

VOLATILE ORGANIC INSTRUMENT PERFORMANCE CHECK
BROMOFLUOROBENZENE (BFB)

Lab Name: EMAX Inc
Lab Code: EMXT Case No.:
Lab File ID: RID400
Instrument ID: T094
GC Column:RTX502.2ID:0.32mm (mm)

Contract: NWS SEAL BEACH, IR SITE 70.
SAS No.: SDG No.: 101246
BFB Injection Date : 09/22/10
BFB Injection Time : 10:22
Heated Purge: (Y/N) N

m/e	ION ABUNDANCE CRITERIA	% RELATIVE ABUNDANCE
50	15.0 - 40.0% of mass 95	15.93
75	30.0 - 60.0% of mass 95	41.09
95	Base peak, 100% relative abundance	100.00
96	5.0 - 9.0% of mass 95	6.84
173	Less than 2.0% of mass 174	0.00(0.00)1
174	Greater than 50% of mass 95	99.73
175	5.0 - 9.0% of mass 174	7.40(7.42)1
176	95.0 - 101.0% of mass 174	96.00(96.35)1
177	5.0 - 9.0% of mass 176	5.90(6.25)2

1-Value is % mass 174 2-Value is % mass 176

THIS CHECK APPLIES TO THE FOLLOWING SAMPLES, MS, MSD,BLANKS, AND STANDARDS:

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD RSK-175
DISSOLVED GASES

SDG#: 10I246

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I246

METHOD RSK-175
DISSOLVED GASES

A total of ten (10) water samples were received on 09/16/10 for Dissolved Gas analysis, Method RSK-175 in accordance with USEPA at R.S. Kerr Environmental Research Laboratory, Ada, OK 74820 March 15, 1989.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method and was verified using a secondary source (ICV). All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for DGI019L/C were all within QC limits.
Percent recoveries for DGI021L/C were all within QC limits.

Matrix QC Sample
A set of MS/MSD was analyzed with the samples in this SDG.
Percent recoveries for I246-02M/S were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LAB CHRONICLE
DISSOLVED GASES

Client : INSIGHT EEC, INC.
Project : NWS SEAL BEACH, IR SITE 70.

SDG NO. : 101246

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

SDG#: 10I246

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I246

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

A total of six (6) water samples were received on 09/16/10 for Dissolved Metals by ICP analysis, Method 3010A/6010B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Initial Calibration was established as prescribed by the method and was verified using a secondary source. Interference checks were performed and results were within required limits. Continuing calibration verifications and continuing calibration blanks were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for IPI094WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recoveries for I246-02M/S were within project QC limits.
In addition, analytical spike and serial dilution were analyzed for matrix interference evaluation. Results were within method acceptance criteria.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LAB CHRONICLE

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

WET CHEMICAL ANALYSES

SDG#: 10I246

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I246

METHOD 300.0
ANIONS BY IC

A total of seven (7) water samples were received on 09/16/10 for Anions (Bromide, Chloride, Nitrate-N, Nitrite-N and Sulfate) by IC analysis, Method 300.0 in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, three (3) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Three (3) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for ICI045WL/C were all within QC limits.
Percent recoveries for ICI047WL/C were all within QC limits.
Percent recoveries for ICI051WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recoveries for I246-02M/S were within project QC limits.
Sample duplicate was also analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.
Sample I246-01 was initially analyzed at DF 2 for Bromide, Nitrate-N and Nitrite-N due to strong odor.
Sample I246-06 and -07 were reported from DF 2 for Nitrite-N due to matrix interference.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I246

METHOD 300.0(M)
ORGANIC ACIDS BY IC

A total of seven (7) water samples were received on 09/16/10 for Organic Acids (Acetate, Butyrate, Lactate and Propionate) by IC analysis, Method 300.0(M) in accordance with Methods for the Determination of Inorganic Substances in Environmental Samples (EPA/600/R-93/100).

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for HCI018WL/C were all within QC limits.
Percent recoveries for HCI030WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recovery for I246-02M was within project QC limits.
Sample duplicate was also analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

FINAL

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I246

METHOD 2320B
TOTAL ALKALINITY

A total of seven (7) water samples were received on 09/16/10 for Alkalinity analysis, Method 2320B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for ALI014WL/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated for this SDG. However, sample duplicate was analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I246

METHOD 2540C
TOTAL DISSOLVED SOLIDS

A total of seven (7) water samples were received on 09/16/10 for Total Dissolved Solids analysis, Method 2540C in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Balance calibration was checked as prescribed by the method. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for TDI010WL/C were within QC limits.

Matrix QC Sample
Sample duplicate was analyzed with the samples in this SDG. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I246

METHOD 4500F
DISSOLVED HYDROGEN SULFIDE

A total of six (6) water samples were received on 09/16/10 for Dissolved Hydrogen Sulfide analysis, Method 4500F in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Matrix QC Sample
No matrix QC sample was designated for this SDG. However, sample duplicate was analyzed with the samples. RPD was within project limit.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

METHOD 4500F
Dissolved Hydrogen Sulfide

Client : INSIGHT EEC, INC.
Project : NWS SEAL BEACH, IR SITE 7C.
Batch No. : 101246

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I246

METHOD SM5310B
TOC

A total of seven (7) water samples were received on 09/16/10 for Total Organic Carbon analysis, Method SM5310B in accordance with Standard Methods for the Examination of Water and Wastewater, 20th Edition.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using a secondary source. Continuing calibration verifications were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary forms for details.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for TCI010WL/C were all within QC limits.
Percent recoveries for TCI012WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recoveries for I246-02M/S were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

Subject: Laboratory Report
Project: NWS SEAL BEACH, IR SITE 70.

Enclosed is the Laboratory report for samples received on 09/17/10.
The data reported relate only to samples listed below :

Sample ID	Control #	Col Date	Matrix	Analysis
MW-70-PDC01-A10	I266-01	09/17/10	WATER	VOLATILE ORGANICS BY GC/MS
MW-70-55-A10	I266-02	09/17/10	WATER	VOLATILE ORGANICS BY GC/MS
MW-70-23-A10	I266-03	09/17/10	WATER	VOLATILE ORGANICS BY GC/MS
MW-70-16-A10	I266-04	09/17/10	WATER	VOLATILE ORGANICS BY GC/MS
TRIP BLANK-TB-9/17/10	I266-05	09/17/10	WATER	VOLATILE ORGANICS BY GC/MS

The results are summarized on the following pages.

Please feel free to call if you have any questions concerning these results.

Sincerely yours,

for

Casper J. Pang
Laboratory Director

NOTICE: Turn-around-time (TAT) for samples shall not begin until all discrepancies have been resolved. For samples received and discrepancies resolved after 1500 hrs, TAT shall start at 0800 hrs the next business day. The client is responsible for all costs associated with sample disposal. Samples shall be disposed of as soon as practical (but not prior to fifteen (15) calendar days) after issuance of analytical report unless a different sample disposal schedule is pre-arranged with EMAX. Disposal fee for samples defined by CA Title 22 as non-hazardous shall be $5.00 per sample. EMAX will return hazardous samples to the client at the client's expense unless directed in writing otherwise.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I266

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I266

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

A total of five (5) water samples were received on 09/17/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for VO06I25L/C were all within QC limits.
Percent recoveries for VO06I26L/C were all within QC limits.

Matrix QC Sample
No matrix QC sample was designated in this SDG.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

NOTICE: Turnaround time (TAT) for samples shall not begin until all discrepancies have been resolved. For samples received on discrepancies after 1500 hrs, TAT will start at 0830 hrs the next business day. Disclosure of prior knowledge of sample disposal. Samples shall be disposed of as soon as practical (but not prior to fifteen (15) calendar days) after issuance of analytical report unless a different sample disposal schedule is pre-arranged with EMAX. Disposal fee for samples defined by EPA Title 22 as non-hazardous is $5.00 per sample. EMAX will return hazardous samples to the client at the client's expense unless directed otherwise.

EMAX LABORATORIES, INC.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

SDG#: 10I305

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I305

METHOD 5030B/8260B
VOLATILE ORGANICS BY GC/MS

A total of three (3) water samples were received on 09/21/10 for Volatile Organics by GC/MS analysis, Method 5030B/8260B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Instrument Performance and Calibration
Instrument tune check was performed prior to calibration. Instrument mass ratios were within specification. Multi-calibration points were generated to establish initial calibration (ICAL). ICAL was verified using secondary source (ICV). Continuing calibration (CCV) was carried on at a frequency required by the project. All project calibration requirements were satisfied. Refer to calibration summary forms for ICAL, ICV and CCV for details.

Method Blank
Method blanks were analyzed at the frequency required by the project. For this SDG, two (2) method blanks were analyzed with the samples. All results were compliant to project requirement. Refer to QC result summary form for details.

Lab Control Sample
Two (2) sets of LCS/LCD were analyzed with the samples in this SDG.
Percent recoveries for VO06I26L/C were all within QC limits.
Percent recoveries for VO06I30L/C were all within QC limits.

Matrix QC Sample
A set of MS/MSD was analyzed with the samples in this SDG.
Percent recoveries for I305-02U/V were within project QC limits.

Surrogate
Surrogates were added on QC and field samples. Surrogate recoveries were within project QC limits.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

m/e	ION ABUNDANCE CRITERIA	% RELATIVE ABUNDANCE
50	15.0 - 40.0% of mass 95	18.78
75	30.0 - 60.0% of mass 95	43.86
95	Base peak, 100% relative abundance	100.00
96	5.0 - 9.0% of mass 95	6.68
173	Less than 2.0% of mass 174	0.00(0.0)1
174	Greater than 50% of mass 95	79.15
175	5.0 - 9.0% of mass 174	5.90(7.5)1
176	95.0 - 101.0% of mass 174	76.41(96.5)1
177	5.0 - 9.0% of mass 176	5.16(6.8)2

1-value is % mass 174 2-value is % mass 176

THIS CHECK APPLIES TO THE FOLLOWING SAMPLES, MS, MSD, BLANKS, AND STANDARDS:

VOLATILE ORGANIC INSTRUMENT PERFORMANCE CHECK
BROMOFLUOROBENZENE (BFB)

Lab Name: EMAX Inc
Lab Code: EMXT Case No.:
Lab File ID: RIW514
Instrument ID: T006
GC Column:RTX502.21D:0.32mm (mm)

Contract: NWS SEAL BEACH, IR SITE 70.
SAS No.: SDG No.: 101305
BFB Injection Date : 09/28/10
BFB Injection Time : 07:15
Heated Purge: (Y/N) N

m/e	ION ABUNDANCE CRITERIA	% RELATIVE ABUNDANCE
50	15.0 - 40.0% of mass 95	18.59
75	30.0 - 60.0% of mass 95	45.54
95	Base peak, 100% relative abundance	100.00
96	5.0 - 9.0% of mass 95	6.85
173	Less than 2.0% of mass 174	0.00(0.0)1
174	Greater than 50% of mass 95	79.47
175	5.0 - 9.0% of mass 174	5.73(7.2)1
176	95.0 - 101.0% of mass 174	77.57(97.6)1
177	5.0 - 9.0% of mass 176	5.00(6.4)2

1-value is % mass 174 2-value is % mass 176

THIS CHECK APPLIES TO THE FOLLOWING SAMPLES, MS, MSD, BLANKS, AND STANDARDS:

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD RSK-175
DISSOLVED GASES

SDG#: 10I305

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I305

METHOD RSK-175
DISSOLVED GASES

A total of two (2) water samples were received on 09/21/10 for Dissolved Gas analysis, Method RSK-175 in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
Samples were analyzed within the prescribed holding time.

Calibration
Calibration was performed as prescribed by the method and was verified using a secondary source (ICV). All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for DGI023L/C were all within QC limits.

Matrix QC Sample
A set of MS/MSD was analyzed with the samples in this SDG.
Percent recoveries were within project QC limits except for results qualified with [*] in I305-02 M/S summary form, most likely due to matrix interference. Check QC summary form for details.

Sample Analysis
Samples were analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LABORATORY REPORT FOR

INSIGHT EEC, INC.

NWS SEAL BEACH, IR SITE 70.

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

SDG#: 10I305

CASE NARRATIVE

Client : INSIGHT EEC, INC.

Project : NWS SEAL BEACH, IR SITE 70.

SDG : 10I305

METHOD 3010A/6010B
DISSOLVED METALS BY TRACE ICP

One (1) water sample was received on 09/21/10 for Dissolved Metals by ICP analysis, Method 3010A/6010B in accordance with USEPA SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods.

Holding Time
The sample was analyzed within the prescribed holding time.

Calibration
Initial Calibration was established as prescribed by the method and was verified using a secondary source. Interference checks were performed and results were within required limits. Continuing calibration verifications and continuing calibration blanks were carried out at the frequency specified by the project. All calibration requirements were within acceptance criteria.

Method Blank
Method blank was analyzed at the frequency required by the project. For this SDG, one method blank was analyzed with the samples. Result was compliant to project requirement.

Lab Control Sample
A set of LCS/LCD was analyzed with the samples in this SDG.
Percent recoveries for IPI097WL/C were all within QC limits.

Matrix QC Sample
Matrix QC sample was analyzed at the frequency prescribed by the project.
Percent recoveries for I305-02M/S were within project QC limits.
In addition, analytical spike and serial dilution were analyzed for matrix interference evaluation. Results were within method acceptance criteria.

Sample Analysis
The sample was analyzed according to prescribed analytical procedures. All project requirements were met otherwise anomalies were discussed within the associated QC parameter.

LAB CHRONICLE
DISSOLVED METALS BY TRACE ICP

Client : INSIGHT ECO, INC.
Project : NWS SEAL BEACH, IR SITE 70.
