

United States National Support Element Larissa: IT Dept

The IT office will establish an e-mail account for all personnel assigned to the USNSE. Personnel assigned to military organizations that are supported by USNSE will have to register their e-mail account with the USNSE IT department. Therefore, check in with the IT department is mandatory. For Internet access at home our staff will assist you with the necessary paperwork and points of contact. NSE does not provide Internet access at private residences. DSL access is available in many areas, however, lines are limited. Members should be prepared to wait several weeks to receive internet access at home. The MWR provides an internet café where you can access your personal e-mail accounts or surf the net.
