

## NAVAL STATION EVERETT ENVIRONMENTAL POLICY

I am proud of Naval Station Everett's environmental stewardship and Environmental Management is one of my highest priorities. I am committed to an integrated work force operating in an environmentally responsible manner where national defense and environmental protection are, and must remain, compatible goals.

Our combined vision includes a commitment to continual environmental improvement and to be recognized as an environmentally friendly neighbor actively engaged in community outreach, resource conservation, and pollution prevention while effectively executing the Navy mission. With integrated support from tenant commands, I am committed to developing policies and making decisions that incorporate environmental considerations into daily activities on board Naval Station Everett to ensure an overarching culture of environmental stewardship.

We are committed to complying with all applicable legal and other requirements when executing the Navy's mission, and considering the potential for environmental effects as a result of our actions. The Executive Officer and I support the completion and implementation of environmental objectives.

We CARE:

- Continual Improvement
- Awareness
- Resource Conservation
- Environmental Compliance

  
M. A. LAKAMP  
Captain, U. S. Navy  
Commanding Officer, Naval Station Everett

I support Naval Station Everett's environmental policy as the driver for implementing and improving the Environmental Management System so all functions and organizations can maintain environmental compliance, improve environmental quality, and achieve pollution prevention goals.

J. S. RUTH  
Rear Admiral, U. S. Navy  
Commander, Navy Region Northwest
