FOR IMMEDIATE RELEASE

Power Outage on NAF Atsugi

At approximately 14:45 yesterday, NAF Atsugi experienced an un-scheduled base-wide power outage.

After working with Tokyo Electrical Power Co. (TEPCO) and performing extensive testing at our main electrical sub-station, it was discovered that one of the electrical cables that support approximately 15% of the entire base failed.

Areas affected by this electrical line failure include a large portion of Bachelor and Family Housing. This line needs immediate replacement, and we are working with TEPCO, and other high voltage contractors to obtain the replacement cabling (over 100 feet of high voltage line) and replace the shorted cable in the sub-station.

Most base facilities outside of housing have power to include eateries, clubs and gyms.

We do estimate power will not be restored to the affected areas until later in the evening 05 Oct at the earliest. As we receive better estimated times of repair, we will update accordingly. We are working as quickly as possible to make necessary repairs, and apologize for any inconvenience this outage may be causing.

The outage has also affected the Branch Health Clinic. It is open for urgent care only. Dental sick call is being held at the dental flight line clinic in building 1524 until 1500. Influenza immunizations are still available at Cinema 77 until 1700.

For assistance call Fleet and Family Support Center at 264-0122 or 264-0123.
