FOR IMMEDIATE RELEASE

5 October 2011

Demolition training planned at Naval Weapons Station Earle

Colts Neck, N.J. – In conjunction with the Transportation Security Administration, Explosives and Explosives Effects training is planned at Naval Weapons Station (NWS) Earle during the week of October 17-21, 2011. The Explosive Ordnance Disposal team at NWS Earle periodically coordinates this and other types of explosive demolition training.

Local residents living near NWS Earle should not be alarmed if they hear detonations during the period October 17-21. The detonations are planned for the afternoon hours, however, weather conditions may dictate scheduling them for the morning on some days.

For more information, please contact Michael Brady, Public Affairs Officer, (732) 866-2171.
