

Naval Base Point Loma (NBPL) Environmental Management System (EMS) Significant Aspects

At NBPL, through the span of our activities, we consider environmental stewardship an integral part of productivity and providing quality services. To this end, the top EMS Aspects for NBPL's program are:

- Energy Usage**: How can each individual and organization at NBPL reduce the use of energy for their operations at NBPL?
- Volatile Organic Compounds (VOCs)**: How can each individual and organization at NBPL reduce the release of VOCs for their operations at NBPL?
- Storm water discharges**: How can each individual and organization at NBPL reduce the amount of pollutants that potentially go into storm water discharges for their operations at NBPL?
- Unintended releases / spills**: How can each individual and organization at NBPL reduce accidental releases or spills for their operations at NBPL?
