

SHIPMENT OF PETS TO THE UNITED STATES
AMC FLIGHTS

- Rabies vaccination must be given less than 12 months and more than 30 days from flight. Rabies certificates are required to schedule the AMC flight – we can provide this if the vaccine was done on base. Microchip must be present.
- Schedule an appointment for a Health Certificate with the NSA Vet Clinic a few weeks before your flight. The appointment must be made for less than 10 days prior to departure. If the US Army Vet is not available you can obtain a health certificate from a local vet with an English translation.
- No Pet Passport is needed!
- We recommend having blood drawn (dogs only) for a Leish blood test (\$20 on base). This is IN CASE you get bumped from the AMC flight and have to take a commercial flight. Commercial flights require the Leishmaniasis blood tests in order for the Italian ASL vet to issue a pet passport. The blood test can be done anytime between 30 days and 12 months from the flight.
