

Dear Parents,

Rassieur Youth Center's School Age Care program is offering an educational enhancement program called Power Hour. The program is designed specifically to help members with homework. This program is available after school Monday through Friday from 15:30-17:00 (3:15-5:00). Dedicated team members and volunteers supervise each session and help members complete their assignments for the day. When members finish their work, they may choose to participate in a variety of other engaging and educational activities to develop their skills even further.

Members earn Power Points for participating in the program, completing their homework, and taking part in additional learning activities. The points they earn can be exchanged for attractive prizes throughout the year.

The Power Hour program is free, and any member of the Rassieur Youth Center Boys & Girls program may join. Power Hour is a great opportunity for members to get their homework completed in a quiet place with adult support.

If you are interested in having your son or daughter participate in Power Hour please fill out the form.
