FIRE & EMERGENCY SERVICES

Here are some important facts regarding escape planning:

- * According to an NFPA survey, only one-third of Americans have both developed and practiced a home fire escape plan.
- * Almost three-quarters of Americans have an escape plan; however, less than half have actually practiced it.
- * One-third of American households estimate they thought they would have at least 6 minutes before a fire in their home would become life threatening. The time available is often less. And only 8% said their first thought on hearing a smoke alarm would be to get out!

Do you know a second way out of the building you're in?

When you go to a restaurant, a Japanese department store, the NEX or anywhere else, you should always take note of where other exits are located. It could save your life and others. For more information check out the NFPA's Fire Prevention Website [here](#)

SAFETY

Warm weather is here and the heat index will begin to rise, everyone needs to pay attention to the flag conditions here on Atsugi and understand what they mean.

There are five conditions listed for the heat flag warnings from least to most severe.

It is important to note that some of these flag conditions have extremely narrow 2-3 degree ranges. That means that temperatures can rise from yellow to black more quickly than the flag station operator's observation interval. It is also essential to always keep in mind that extreme conditions can lead to serious health problems such as dehydration, heat exhaustion, heat stroke **and even death**.

| <u>Flag Condition Guidelines</u> | | | |
|---|-------------------|----------------------|---|
| | <u>Flag Color</u> | <u>WGBT Index</u> | <u>Intensity of Exercise</u> |
|  | White Flag | <80 degrees | Extremely intense physical output may precipitate heat injury. Caution should be taken. |
|  | Green Flag | 80-84.9 degrees | Heavy exercise for un-acclimated personnel should be conducted with caution and under responsible supervision. |
|  | Yellow Flag | 85-87.9 degrees | Strenuous exercise and activity should be curtailed for all personnel with less than 3 weeks training in hot weather. |
|  | Red Flag | 88-89.9 degrees | Strenuous exercise curtailed for all personnel with less than 12 weeks training in hot weather. |
|  | Black Flag | 90 degrees and above | Physical training and strenuous exercise suspended for all personnel (excluding operational commitments). |

NEXs Are Going “Navy Blue” This Holiday Season: NEXs worldwide will be taking a new approach to the holiday shopping season this year. NEXs will offer sales and specials throughout the holiday season beginning in early November instead of starting off the holiday shopping season with a big sale the day after Thanksgiving. “For the 2012 holiday shopping season, we have revised and refreshed our approach to the traditional ‘Black Friday’ sales events. We are calling it ‘Navy Blue Friday’ and will emphasize Navy core values, Navy family and preserving Thanksgiving cultural values,” said Robert J. Bianchi, Chief Executive Officer, Navy Exchange Service Command (NEXCOM). “We will also provide broader access to NEX sale items for afloat and deployed Sailors.” NEX customers will still find a wide variety of holiday gifts on sale as they have in the past. The prices on the items for sale will last for the duration of the sale, not be limited to a certain day or time period. NEX events will begin, worldwide, at 6:00 a.m. on Friday morning, featuring all day Friday specials and additional sale items will be available across the entire three-day weekend.
