Welcome Aboard for our Newest HQ N30/F&ES Shipmate, Chief Robert Sepulveda. Robert will be working in our Assessment Branch, at our San Diego office. He will serve as a Fire Protection Specialist for CNIC Fire & Emergency Services; he has proudly served the fire service community since 1998. Prior to transferring to CNIC he had served as the Regional Fire Chief for Navy Region Southwest Fire & Emergency Services.

Another enhancement to our HQ Team is our selection of Chris Handley to fill one of our Deputy Director positions. Congratulations Chris! Chris has been with our HQ team for many years as a Senior Program Analyst /Leader. BZ to Chris for moving up to the Deputy Director position and taking on even greater responsibilities with our Team!

Thanks to all our Navy F&ES Teams and members who serve. Please stay safe, and ensure Everyone Goes Home.

Carl

In Memoriam

Chief Thomas “TJ” Julius Maury, Jr.

Chief Thomas “TJ” Julius Maury, Jr., 39, of Kenner, passed away on August 22, 2023, after a five-year battle against cancer.

TJ was born on September 2, 1983, to Thomas Julius Maury, Sr. and Betty Jean (Dufren) Maury in Houma. In 1999, while attending L.W. Higgins High School, TJ met his wife, Betty Ann (Gainey) Maury, when she volunteered to marry him at a Sadie Hawkins’s dance. TJ and Betty Ann have two sons, Thomas Julius Maury, III and Lucas Joseph Maury, and a recently welcomed daughter-in-law, Tuong Vi Thi Huynh.

In 2007, TJ entered federal civil fire service with the United States Navy. He rose through the ranks to serve as Fire Chief at Naval Construction Battalion Center Fire and Emergency Services in Gulfport, Mississippi, and then at Naval Air Station Joint Reserve Base New Orleans Fire and Emergency Services where his watch ended. TJ received numerous accolades throughout his career, including Navy Civilian Fire Officer of the year.

TJ was most known for his contagious smile, his fortitude, and his love of family, friends, and Batman. He inherited his father’s strong work ethic and his mother’s kind nature. He was spoiled by his sisters with food and truck parts. When TJ was not saving lives, he ran marathons, enjoyed football games, and attended concerts with his friends.

He is survived by his beautiful wife, Betty, and amazing sons, Tommy (Vi) and Lucas; loving grandmother, Mary Jean Billiot Dufren; proud parents, Thomas Julius Maury, Sr. and Betty Jean Maury; his adoring sisters,
Chasadie Mary Maury Flanagan (William) and Gidget Mary Maury Leblanc (Tory); his nieces and nephews, Trent, Isaiah, Haylee, Seth, Aaliyah, Bridget, Victoria, Trevor, Alayna, Levi, and Owen; and numerous loud and fun aunts, uncles, and cousins.

The family gives its most sincere gratitude to an unyielding support network, especially TJ’s brothers and sisters within the fire department, his many chemo buddies, Dr. Suma Satti, Dr. William Forrest Johnston, and his medical team and staff at Ochsner Cancer Centers.

In lieu of flowers, the family requests donations be made to “Camp Kesem” or “Louisiana Firefighter Cancer Support Network” to support other families in their battles against cancer.

**Assistant Fire Chief Jeffrey Post**

The Naval Submarine Base New London (SUBASE) Fire Department is grieving the loss of one of its senior leaders.

Assistant Fire Chief Jeffrey Post passed away Wednesday, August 2, after battling a long illness.

“We are extremely saddened to report that the SUBASE New London Fire Department, the First and Finest, lost one of our bravest,” said Fire Chief Tommy Clapsadle. “Assistant Chief Jeffrey Post was a great leader in the department and a valued team member and colleague. His passing leaves a hole in our hearts that cannot be filled.”

Post, a native of Mystic, Connecticut, began his firefighter career as a volunteer and joined the SUBASE Fire Department in December 2001.

He had been an Assistant Fire Chief at SUBASE since August 2016.

Post was a dedicated firefighter, EMT, and HAZMAT and Rescue expert. Intelligent, proud, and team oriented, his impact traveled well-beyond SUBASE’s fence line. He helped lead the SUBASE Fire Department response team that rushed to Portsmouth Naval Shipyard in Kittery, Maine to assist in controlling and ultimately extinguishing the USS Miami (SSN 755) fire in May 2012.

Most recently, he notably contributed to the technically complex, confined space rescue of a Ledyard, Connecticut man who fell down a 30-foot well in November 2022.

A dedicated Fire Service Instructor, his commitment to training and mentoring the next generation of Firefighters through his efforts at SUBASE, the Region, and the Connecticut Fire Academy has left a legacy. SUBASE Fire Department Stations 1 and 2 have been adorned with black and purple bunting in Post’s honor.

“We ask that you keep Jeff’s family in your thoughts and prayers as they and we move through this extremely difficult time,” asked Clapsadle.

**Rest in Peace Brothers ... We Have the Watch**
Taking Care of Our Own

From: CNIC HQ Fire & Emergency Services

The Taking Care of Our Own Program was launched in October 2005 to provide a support network for federal civilian members of the DoD Fire and Emergency Services family. The Program provides a simple, systematic, DoD-wide means to help family members in crisis who have exhausted their leave. The program entails alerting all members of the family that a fellow member is suffering from a personal or family (medical) crisis and has been approved for Volunteer Leave Transfer Program. Each family member is asked to donate at least one hour of annual leave to the member in crisis so they can focus on recovering rather than worrying about loss of the pay check (the result of running out of leave). Participation in the program is completely voluntary and no member may be pressured to donate. The single requirement is that the leave recipient must be approved for the Volunteer Leave Transfer Program.

“Touch a Truck” (con’t. from page 1)

“Community education, collaboration, and involvement is at the center of everything we do in our department,” said NASJRB New Orleans Fire Chief Thomas Maury Jr. “With this up close and personal approach of enlightening children, as well as adults, we let them know who we are, what we do, and show them the tools we use to do the job.”

Local fire departments including the Belle Chasse Fire Department and Terrytown Fire Department also joined in the event that saw more than 150 local children and adults in attendance.

To add to the excitement of the inaugural event, Terrytown Fire Department brought their classic 1948 Fox Fire Engine to illustrate not just the history of the fire service, but the pride and professionalism that firefighters have in taking care of their equipment.

In total, there were seven fire department apparatus on display, including an aerial from Belle Chasse, aerial platform ARFF apparatus from Terrytown, rescue truck, ambulance, and the chief command vehicle from NASJRB.

Con’t. on next page
The various trucks and equipment showed the community the full scope of our supporting capabilities. For example, the rescue truck houses a vast array of equipment, such as the “jaws of life”, ropes, rigging, technical rescue, HAZMAT equipment, and more.

Whether on base or with mutual aid partners, NASJRB New Orleans works collectively to save lives, minimize incidents, and conserve property. While giving tours of the apparatus and equipment, many conversations were had. (left) A firefighter assigned to NASJRB New Orleans explains the capabilities of the ARFF apparatus to attendees at the “Touch a Truck” event, July 1, 2023. (U.S. Navy photo by Todd Albarado)

“A large number of children said ‘when I grow up, I want to a firefighter’,” said NASJRB New Orleans Captain Tony Barnes. Barnes went of to say his high point of the event is giving back to the community, especially to the youths.

The day was spent allowing the attendees to live up to the events name, “Touch a Truck”. Members of the community entered each vehicle and were able to partially experience the life of a first responder behind the wheel.

(above) NASJRB New Orleans recently hosted their inaugural “Touch a Truck” event, July 1, 2023. (U.S. Navy photo by Todd Albarado)
Because of the sheer size and its two turret nozzles, the ARFF apparatus always seems to be a highlight. During the tours, the crowds were impressed to find out that these apparatus can hold 3,000 gallons of water. The astonishment is taken a step beyond whenever visitors have the opportunity to touch and feel the weight of the structural bunker gear, the SCBA bottle, and helmet that firefighters must wear on every call while performing their duties.

One would think that this would dissuade someone from wanting to be a firefighter but in direct contrast, this is the moment when most kids say ‘I want to be a firefighter!’

“It feels good every time we do this, educating and entertaining at the same time.” says Assistant Fire Chief Albarado. NASJRB and its partners look forward to continuing community events such as this one while continuing to provide stellar service to the community with the help of the Terrytown and Belle Chasse Fire Departments.

Fire Service Scholarships and Leadership Related Special Projects Awards Available for 2023

Contact: Mark Brady – Public Information Officer, 443-775-0157

The Yvorra Leadership Development Foundation (YLD) is currently accepting applications for its 2023 Scholarships and Leadership Special Projects related to leadership development. The awards are in memory of Deputy Fire Chief James G. Yvorra, Emergency Medical Technician Donald E. Sellers, and Chief John M. Eversole.

Any active career or volunteer Fire, Rescue, EMS, or Emergency Management member or active duty or reserve U.S. military member who serves in an emergency response position is eligible. Annual awards are approximately $3,000 each and five or more awards may be issued to U.S. citizens in 2023.

In addition to one award for firefighters, there is an award set aside for Hazardous Materials Responders, one for Emergency Medical Service Responders, and one or more for the Chief G. Crawford Wiestling Award. Special awards of greater value may be issued for leadership development related special projects proposed by individuals or groups.

To request an application go to [http://www.yld.org](http://www.yld.org) and click “Applications”.

The deadline for applications is October 30, 2023 and awards are announced in late December.
The Arleigh Burke-class guided-missile destroyer USS Higgins (DDG 76) and Commander, Fleet Activities Yokosuka completed an integrated shipboard firefighting nighttime drill, May 10, 2023.

Working together with Commander, Naval Region Japan Fire & Emergency Services, and Yokosuka’s Ship Repair Facility, Higgins damage control organization devised and executed a complex drill involving a simulated fire spread, a missing person, and an injured firefighter.

“This was a great effort on the part of Higgins crew, SRF, and CFAY Fire Department,” said Capt. Joseph L. McGettigan, commanding officer USS Higgins. “We have to be prepared to work alongside our civilian counterparts in the event of a major fire. I’m proud of the team’s hard work integrating with the base firefighters to demonstrate our casualty response capability together during after-hours.”

The drill, required by the Industrial Ship Safety Manual for Fire Prevention, also known as the 8010 Manual, was created to train integrated teams of Sailors and base civilian firefighters to combat casualties in industrial environments.

Within seconds of receiving a report of simulated smoke, Higgins notified SRF and F&ES, prompting fire engines to converge on (right) CFAY F&ES District Fire Chief Yoshinobu Arai coordinates simulated firefighting efforts with USS Higgins (DDG 76) during a nighttime shipboard fire drill, May 10, 2023. (U.S. Navy photo courtesy of CFAY F&ES)
CNRJ F&ES Completes Annual Night-time Drill (con’t.)

Higgins, moored pierside at Harbor Master Pier East. At the same time, Sailors conducted the initial firefighting efforts, and SRF evacuated civilian contractors. When the fire grew out of control, Higgins requested the base’s assistance while evacuating the entire crew. Once integrated, four-person teams consisting of Navy and civilian firefighters reentered the ship to relieve the attack teams already engaged in the fire.

On the quarterdeck of the ship, leadership from Higgins, F&ES, and SRF set up an Incident Command Post to monitor firefighters onboard and at various stations off the ship on the pier, including rehabilitation, secondary water supply, Self-Contained Breathing Apparatus recharge, staging, and triage.

Rescue and Assistance teams also arrived from USS Dewey (DDG 105), one of thirteen U.S. 7th Fleet forward-deployed ships in the Indo-Pacific region.

The 8010 nighttime shipboard fire drill is crucial for all ships during maintenance availability. It ensures all ship crew members understand the basics of fire prevention and prepares them to deal with a real-world fire emergency. CNRJ F&ES are here to assist all ships in preparing for emergencies on or off board any ship, day or night.

(Left) A ladder truck from CFAY F&ES is set up pierside next to USS Higgins (DDG 76) during a night-time shipboard fire drill, May 10, 2023. (U.S. Navy photo courtesy of CFAY F&ES)
All,

The NFPA has released a new report Fatal Firefighter Injuries in the US in 2022 which showed a total of 96 on-duty U.S. firefighter fatalities in 2022. Of these deaths, 51 were volunteer firefighters, 38 were career firefighters, six were contractors for federal or state land management agencies, and one was a full-time federal land management employee.

Report Link: https://tinyurl.com/dkxynev9

The number of injury and cardiac-related fatalities in 2022 is higher than past years, largely due to the inclusion of deaths occurring within 24 hours of duty, which were previously not counted in the report unless there was a specific physical complaint while on duty. The report now includes fatal injuries and cardiac deaths that occurred within 24 hours of duty, irrespective of manifested or reported symptoms.

“Sudden cardiac deaths or cardiac conditions regularly account for the largest share of on-duty firefighter deaths,” said Richard Campbell, author of the report and a senior research analyst at NFPA. “By adjusting the reporting period by 24 hours, we were able to more fully capture cardiac failure among firefighters, allowing us to more accurately identify the serious health risks firefighters face on the job.”

However, Campbell notes, an unknown number of deaths due to unspecified medical causes in 2022 were likely cardiac related, so the reported number of cardiac deaths likely continues to understate the true total.

The report categorizes the type of duty that firefighters were engaged in when the deaths occurred, including deaths that occurred:

• on the fireground;
• at a non-fire emergency;
• responding to or returning from emergency calls; and
• during training.

Trauma injuries accounted for 33 firefighter deaths, including 20 internal trauma deaths, six deaths by crushing, five deaths due to unspecified traumatic injuries, and two deaths due to gunshot injuries or projectile wounds.

In addition, six multiple fatality incidents occurred in 2022, tying for the highest number of multiple fatality incidents since 2009. Four of the incidents involved vehicles, each resulting in two fatalities. The two remaining

Con’t. on next page
incidents involved structure fires, one in which three firefighters were killed in a building collapse and the other in which two firefighters died after sending a mayday from the second floor of a house.

Just over one-fifth of firefighter deaths (21) occurred while responding to or returning from emergencies. The report also showed that overexertion and stress accounted for just over one-half of the deaths in 2022. Of the 49 deaths in this category:

• 34 were sudden cardiac incidents and one was due to cardiac symptoms.
• 11 deaths included an unspecified medical cause.
• one was due to a stroke or aneurysm; and
• two deaths were the result of drug overdoses.

According to the report, excluding the 340 firefighter deaths that occurred on 9/11, the highest fatal injury total was 174 firefighter deaths in 1978 and the lowest was 48 deaths in 2019. This overall downward trend is an encouraging indication that firefighter injury prevention and health and wellness efforts through the years are being met with success. At the same time, the data shows that work as a firefighter includes significant physical demands, taking place in environments that involve a range of hazardous conditions and presenting risks not only at fire scenes, but during training activities, non-fire emergencies, and transport to and from emergency scenes.

“While significant strides have been made over time to better protect firefighters on the job, firefighters continue to take on more roles and responsibilities, placing significant physical and mental stresses on them that can have fatal consequences,” said Campbell. “Ongoing efforts to adequately address these issues will be needed in order to see meaningful reductions.”

This firefighter fatal Injuries study is made possible by the cooperation and assistance of the United States fire service, CDC’s National Institute for Occupational Safety and Health, the United States Fire Administration, the Forest Service of the U.S. Department of Agriculture, and the Bureau of Indian Affairs and the Bureau of Land Management of the U.S. Department of the Interior.

For this release and other announcements about NFPA initiatives, research and resources, please visit the NFPA press room.

The Secret List 6/22/2023-1413 Hours
www.FireFighterCloseCalls.com
The Tokyo International Fire and Safety Exhibition, held at the Tokyo Big Sight from June 15 to 18, 2023, proved to be a monumental event in the realm of fire safety. Regarded as the largest fire expo in Japan, this exhibition takes place every five years, jointly hosted by the Tokyo Fire Department and Tokyo Big Sight.

Drawing a total of 166,831 visitors, the exhibition this year marked the second-highest attendance in its history, just behind the last exhibition prior to the COVID-19 era. Such a massive turnout attests to the significance of this event and the public’s eagerness to explore the latest developments in fire and safety.

Among the distinguished participants, Commander Naval Region Japan Fire & Emergency Services made a large impact through their diverse offerings. Their vehicle display featured both U.S.-made and Japanese-made National Fire Protection Association (NFPA) vehicles.

Story By: Fire Chief Yuuhei Hino
Regional Training Officer, Commander, Navy Region Japan Fire & Emergency Services

Tokyo International Fire and Safety Exhibition 2023: A Remarkable Showcase of Cutting-Edge Fire and Safety Technologies

Con’t. on next page
Tokyo International Fire and Safety Exhibition 2023 (con’t.)

standard pumpers that provided an insightful comparison between the firefighting capacities, safety features, ergonomic designs of fire apparatus between Japanese and U.S. fire apparatus. This dynamic showcase enabled visitors to grasp the distinct approaches employed by each service and appreciate the varied techniques in fire suppression.

In addition, CNRJ F&ES played a crucial role in public fire safety education, utilizing the Fire Safety House and the E-Extinguisher training device. They captivated audiences and enhanced their understanding of fire prevention education taking place in the U.S. Fire Service.

The most remarkable highlights of CNRJ F&ES’s involvement was their collaboration with the Tokyo Fire Department in a joint drill. The centerpiece of this drill was the FALCON Car Fire Trainer, in simulation that replicated a car trapped after a massive earthquake, subsequently engulfed in flames. Displaying remarkable coordination and expertise, the Naval Air Facility Atsugi crew showcased their exceptional rescue and firefighting skills as they successfully saved a victim from the simulated scenario.

Throughout the event, the CNRJ F&ES team seamlessly demonstrated, not only the difference in approaches to public safety between the U.S. and Japan, but also the uniqueness of being in Japan serving as an ambassador between two distinct firefighting cultures. CNRJ F&ES showed the collaborative spirit that allows for mutual learning, training, assistance, and cooperation in pursuit of the common goal: saving lives in the face of any disaster.

Safe Helpline: How it Works

All Safe Helpline services are anonymous, confidential, and tailored to support members of the DoD community and their loved ones affected by sexual assault.

You will always be connected to a live, specially trained professional.

One of the most profound gifts we can give survivors who come to Safe Helpline is simply listening to them. No one should have to go through healing from a sexual assault alone.

—Sami, Safe Helpline staff member for over three years

Compassion and support are at the heart of DoD Safe Helpline staff. It is what they provide to each visitor, and why we enjoy being a part of Safe Helpline.

—Sydney, Safe Helpline staff member for over ten years

When a survivor is connected with one of our staffers, they should know that this is a safe place, free from judgment or shame. We can help survivors find the support they need and deserve.

—Jason, Safe Helpline staff member for over three years

DID YOU KNOW?

A psychological health condition or seeking professional help will not automatically disqualify you for a security clearance.

The term ‘hook and ladder’ truck can trace its roots back to the early days of fire fighting when horse drawn vehicles carried an assortment of ground ladders to rescue people from upper floors and along with large metal hooks that could be utilized to pull down walls of buildings to prevent fire from spreading to adjoining wood frame buildings. In later years, as apparatus became motorized these vehicles were known as ‘city service ladder’ truck which were capable of carrying longer wooden ground ladders in lengths ranging from 12 feet straight to 55-foot extension ladders.

By the early 1920s, both American LaFrance and Seagrave began producing quad apparatus which combined the city service ladder equipment with a fire pump, booster tank and hose bed to provide a multi-purpose vehicle. The quad apparatus became quite popular with both municipal and military fire departments as these vehicles could provide both engine and ladder company service from a single piece of apparatus. While these rigs were quite long in appearance, they required less space in the

Back in the Day (con’t.):

fire station when compared to a tractor drawn aerial ladder.

During World War II, Seagrave Fire Apparatus built more than 79 quads for the various branches of the service with the majority of these delivered to the U.S. Navy. During 1941, one of the first of these units was delivered to the U.S. Naval Academy in Annapolis, Maryland. The Seagrave quad was designated model 66-E7 and was powered by a V-12 gas engine rated at 185 horsepower and built with a 263 inch wheelbase. While several of these trucks were built without doors and a fold down windshield, the Naval Academy quad was equipped with a few creature comforts including cab doors, rear view mirrors and spot lights mounted on the windshield posts for the driver and officer.

These vehicles were built with Seagrave designed 750 gpm pumps that were completely built within the Seagrave factory with small 100 gallon water tanks. During that time period Seagrave built their own wooden truss ground ladders and the typical ladder compliment consisted of a 50-foot extension ladder, two 35-foot extension ladders, 20, 24 and 28-foot straight wall ladders, 12 and 16-foot roof ladders together with a 16-foot baby bangor ladder.

The Naval Academy quad was assigned property number 73-00021 and was equipped with a chemical powder foam hopper, top mounted deck gun and spare turnout gear on the left side of the apparatus. This vehicle was the second quad placed into service in Annapolis with an American LaFrance quad and pumper acquired during 1937. Other apparatus operated at the Naval Academy and Naval Experimental Station during the war included two 1941 Seagrave pumper, a 1941 Peter Pirsch pumper and several John Bean high pressure fog foam units.

After the conclusion of the World War II many of these Navy pumper and quad apparatus found their way into municipal fire departments that had not been able to acquire new vehicles due to war production efforts. Eventually quad apparatus fell out of favor and were replaced with hydraulically operated aerial ladders as communities expanded with the post war housing boom.

Today, the quad apparatus has been replaced with single axle quint vehicles outfitted with aluminum or steel aerial ladders ranging in length from 75 to 110 feet, with a 2000 gpm fire pump, 500 gallon water tank and compliment of both engine and truck company equipment.

(above) The U.S. Naval Academy fire department had more than the Seagrave Quad in their arsenal, including this 1940 ALF. (photo from the collection of Tom Shand)

UPCOMING ASSESSMENTS

Region area installations should be aware of the Fire & Emergency Services assessment schedules for their locations so they can be prepared. To prepare, installations should conduct self assessments; regions should conduct CART or region review assessments; all before the CNIC assessment team arrives. For more information, contact Eric Rhode:
eric.k.rhode.civ@us.navy.mil

Note: Please stay in touch with Eric, as dates are subject to change.
In calendar year 2022, 145 CNIC Fire and Emergency Services responders were awarded individual Life Saving Award certificates. A team effort that saved the lives of 31 individuals.

So far in CY 2023, 127 individual Life Saving Award certificates have been awarded and 26 lives have been saved.

Below are the awardees from May 22 - Sept. 6, 2023. Bravo Zulu to all. Keep charging!

**From the Desk of Gary Easley:**

**Attention** Hall of Fame members, we are pleased to announce that we have mailed out the new Navy F&ES Hall of Fame lapel pin to all our current hall of famers with current addresses on file with our office. If you did not receive your pin or that for a family member inductee, please contact Gary Easley to update your contact information and we will get a pin sent to you.

You may contact Gary by email: gary.m.easley.civ@us.navy.mil or by phone: (202) 433-6527.
