

Commander Naval Surface Force – U.S. Pacific Fleet

N46/47 Readiness Support

Decision Flow – Common Support Directorate (CSD)

San Diego Waterfront Temporary Assigned Duty (TAD) Sailor Placement

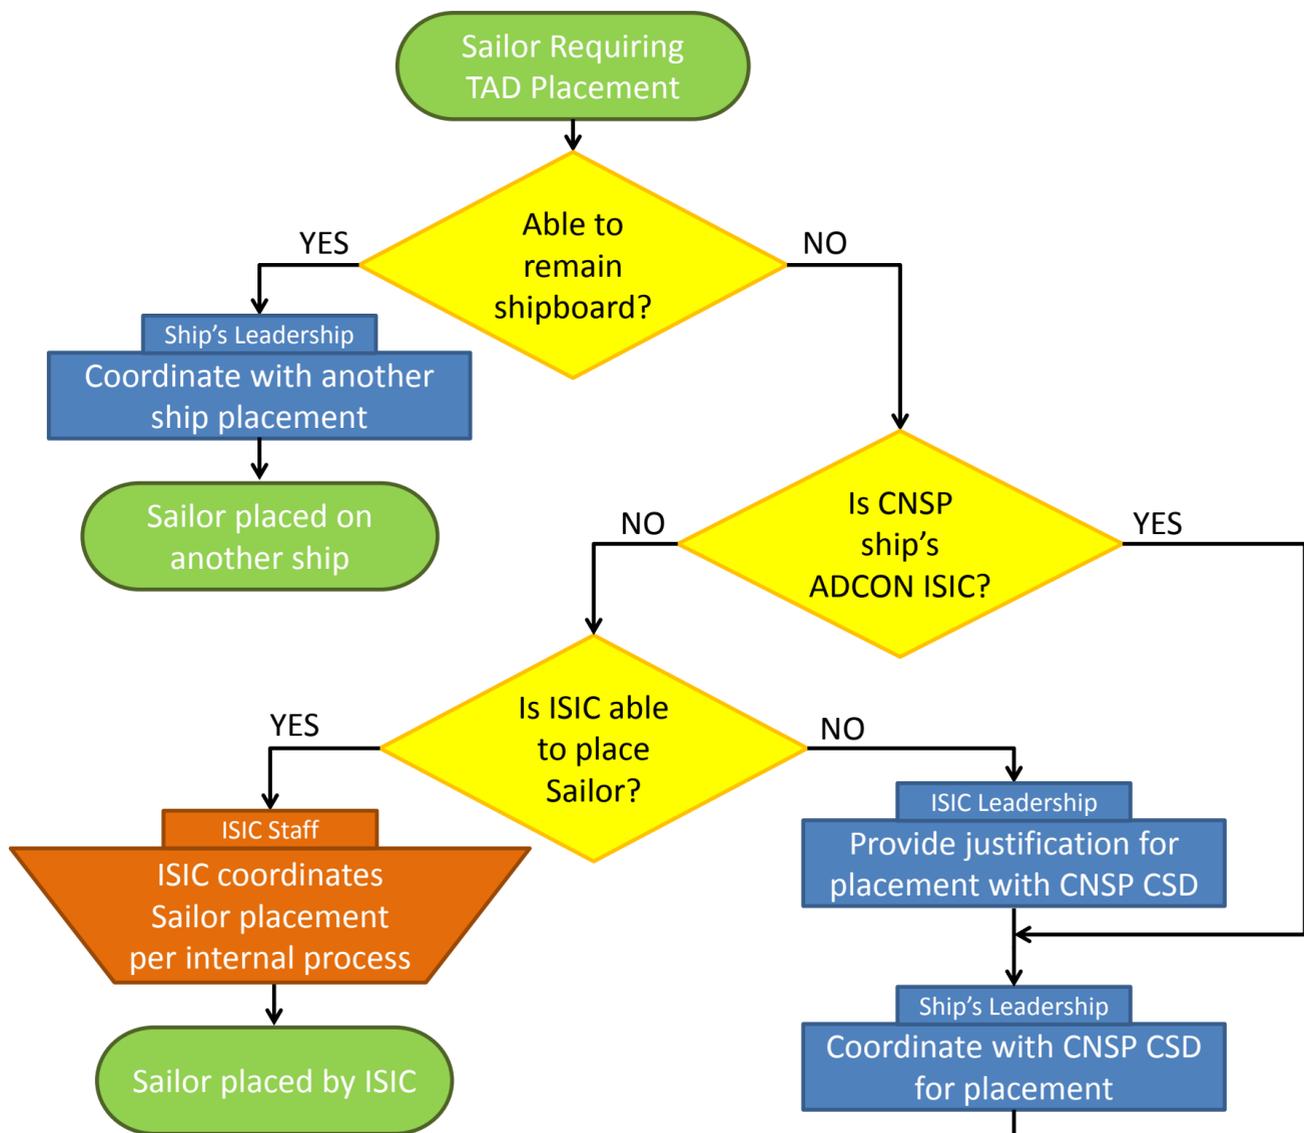

The first decision that must be made is if the circumstances that drive the TAD placement allow a Sailor to remain shipboard taking into consideration the Sailor's health, safety, impact to shipboard good order and discipline, and the safety of other Sailors in a shipboard environment.

Ship's leadership, when challenged with ship to ship placement, shall seek assistance via their Administrative Control chain of command.

CNSP CSD shall accept for placement Sailors from those ships directly under CNSP Administrative Control (ADCON) chain of command.

CNSP expectation is that the ISIC shall assume responsibility for placement of Sailors under their cognizance. Inability of an ISIC to place a Sailor must be fully justified to CNSP as this results in a burden shift to a higher echelon in the ADCON chain of command.

Ships/ISICs shall comply with the guidance promulgated by CNSP CSD regarding the required coordination for Sailor placement. See below.

Ship/ISIC Action

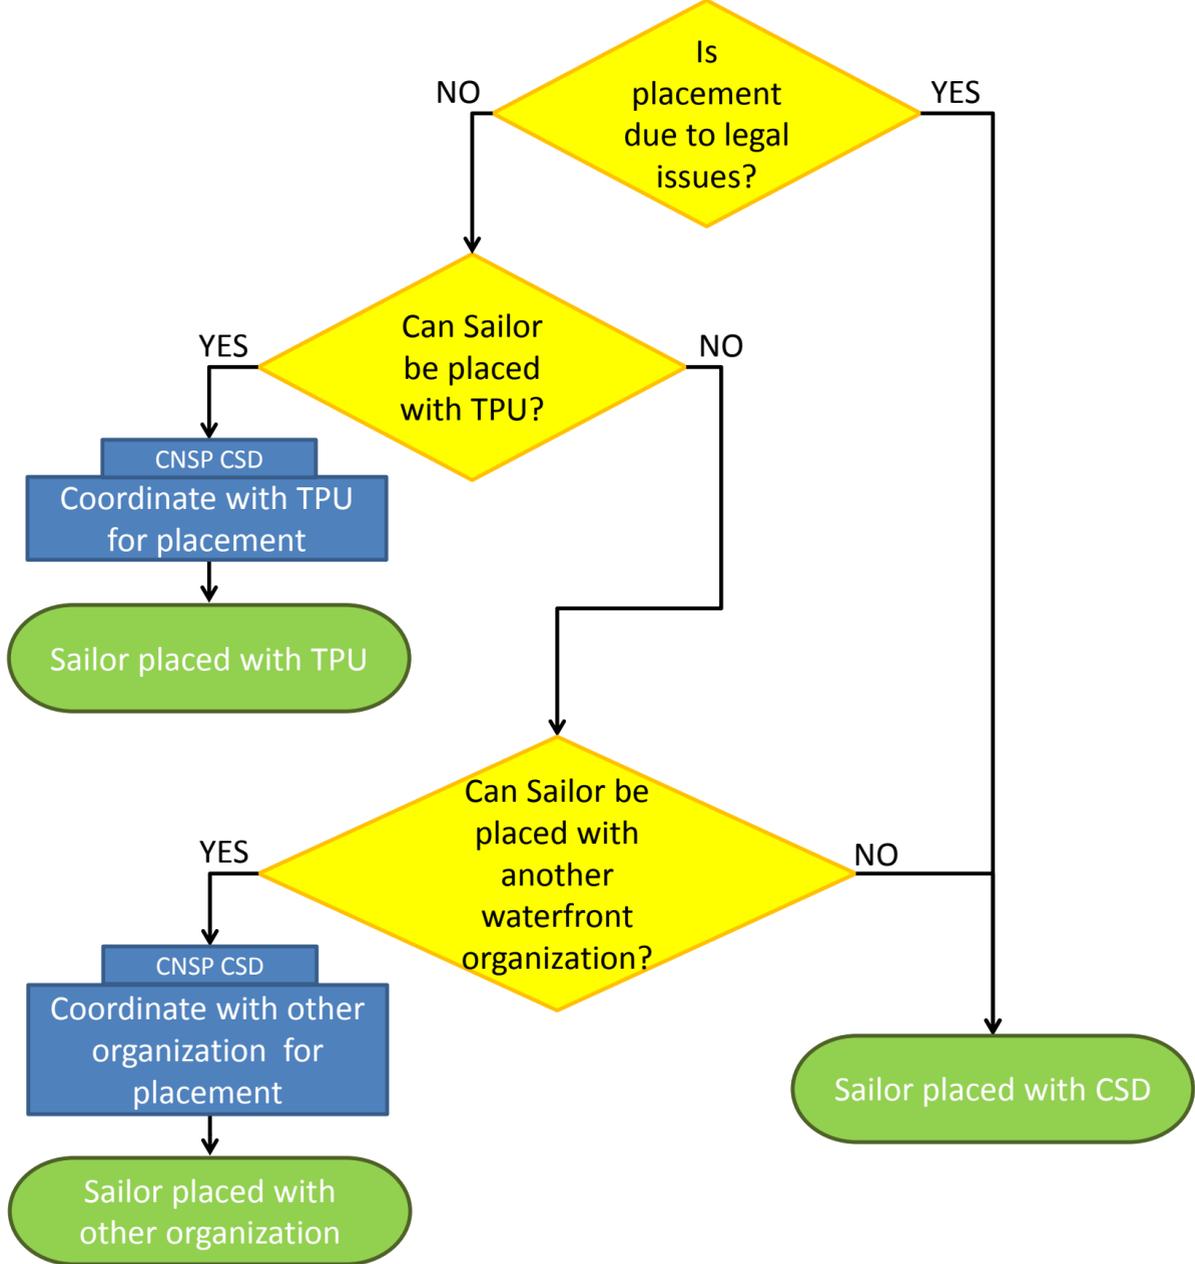

CNSP CSD Action

Sailors with unresolved legal issues will predominantly remain TAD to CNSP CSD.

All Sailors placed with CNSP CSD shall be evaluated for follow-on placement with TPU based on TPU acceptance criteria.

When Sailors can be placed with TPU, CNSP CSD shall coordinate with the ship to provide updated TAD orders for the placement.

Dependent upon the circumstance of a Sailor, they may be employable by another waterfront organization. CNSP CSD shall broker the TAD assignment in these circumstances. When Sailors can be placed with another organization, CNSP CSD shall coordinate with the ship to provide updated TAD orders for the placement.

Guidance regarding the placement of Sailors at CSD can be persistently found at the CNSP N46/47 Readiness Support website located at the following URL:
