

# NSA SOUDA BAY ENVIRONMENTAL POLICY STATEMENT

DEPARTMENT OF THE NAVY  
U.S. NAVAL SUPPORT ACTIVITY SOUDA BAY  
PSC 814 BOX 1  
FPO AE 09865-0102

25 June 2014

As Commanding Officer, I take personal pride in the environmental programs at NSA Souda Bay and consider the environment one of my highest priorities. Protecting the health and safety of our military members, our employees, hosts, visitors and allies is dependent on the protection of our environment. With this Policy Statement, I am making a commitment that NSA Souda Bay will comply with all applicable Environmental rules and regulations, prevent pollution, and will continually improve how we manage these programs. I consider everyone at NSA Souda Bay responsible for following Environmental rules, instructions and policies and for ensuring that they are good stewards of the environment.

NSA Souda Bay will continue to implement an Environmental Management System that will provide top-down chain of command support in both policy and implementation of the Environmental Program. All personnel are expected to comply with environmental regulations as outlined by the DoD Environmental Final Governing Standards for Greece and support implementation of the Environmental Program.

A variety of operations at NSA Souda Bay directly impact the environment. By adopting practices that promote good environmental stewardship and preventing pollution wherever practically possible, we can foster a positive effect on the environment.

We will use our Environmental Quality Board to periodically review our program and set realistic and measurable objectives and targets. Together, we can create the conditions necessary to meet our installation missions while ensuring that we continually improve on how we interact with the environment around us.

  
M. R. MOORE  
Commanding Officer

## NSA SOUDA BAY ENVIRONMENTAL PROGRAM

This policy statement provides NSA Souda Bay's fundamental Environmental goals and direction. The primary elements of our Environmental Program to support the Team Souda mission are:

### ➤ COMPLIANCE

We provide support to ensure compliance with all applicable environmental standards on Air Emissions, Drinking Water, Wastewater, Hazardous Materials, Hazardous, Solid & Medical Wastes, Petroleum, Oil and Lubricants, Pesticides, Cultural & Natural Resources, Asbestos, Lead-Based Paint, Spills and Storage Tanks.

### ➤ SERVICES

We provide hazardous waste, spill prevention & response, pollution prevention, recycling and restoration services.

### ➤ PLANNING

We provide support to ensure planning for projects and operations are documented with environmental assessments, impacts, specifications and reviews. We remain committed to enhancing installation emergency management.

### ➤ CONSERVATION

We provide support to ensure conservation is implemented for the protection of historic & cultural resources and of natural resources.

## ENVIRONMENTAL MANAGEMENT SYSTEM

NSA Souda Bay seeks opportunities to continually enhance environmental performance through improvements to our Environmental Management Systems. We identify priorities, set goals, implement strategies, measure progress and communicate results. We continue to provide appropriate training and information to all employees and staff whose actions impact the environment.
