

Drinking Water Policy Statement

Water is a basic requirement for all life. The production of safe drinking water is one of the most important functions performed aboard NAS Sigonella. The health of our Sigonella Community and Sigonella visitors depends on safe drinking water.

I fully embrace my responsibility for the safety of our drinking water and commit:

- We will strive to always produce safe drinking water.
- We will keep the Sigonella Community informed of drinking water issues.
- We will correct any safe drinking water deficiencies in a timely manner.

The bottom line is always the same:

We make safe drinking water every day, or we don't make water at all.

C. J. DENNIS
Captain, U.S. Navy
Commanding Officer
