ENVIRONMENTAL POLICY STATEMENT

Navy Region Hawaii's mission is to provide and improve shore infrastructure, service support, and training to enable Fleet Operations of Naval Forces. Protection of the environment is an integral part of accomplishing our mission. Navy Region Hawaii is committed to:

- Comply with applicable legal environmental requirements and with other relevant requirements.
- Implement sustainable practices for energy efficiency and reduction in water consumption.
- Reduce solid waste generation and increase recycling. Purchase green products and those made from recycled materials.
- Preserve our natural, historic, and cultural resources.
- Utilize Environmental Management System (EMS) as a tool to establish and review environmental objectives and targets.
- Maintain community relations by partnering with our neighbors and regulatory agencies to create goodwill and build trust.
- Provide continual improvement of our environmental performance and prevention of pollution.

It is the responsibility of all personnel, tenants, and contractors to help protect Hawaii's environment. I depend on each member of the Navy Region Hawaii team to reduce our impact to the environment, comply with environmental requirements, and limit consumption of our natural resources. This policy shall be communicated to all personnel, customers, and stakeholders.

F. L. PONDS
