

Subj: PREVENTIVE MEDICINE SANITATION INSPECTIONS

The Naval Preventive Medicine Manual on Sanitation Standards (NAVMED P-5010-2) has established an inspection for all Government Owned Family Housing to ensure that the homes are maintained in a safe and sanitary condition. Per this instruction, a routine inspection of Family Housing Units will be conducted by Preventive Medicine and Housing Personnel on at least 10 percent of the total number of housing units annually. Beginning this month, we have commenced scheduling these required inspections. We appreciate the cooperation of all of our Housing residents during this inspection process. These inspections will normally be conducted on a weekly basis and residents will be given at least 3 days advance notification prior to the scheduled inspection date.
