Engineer (Structural), #525-7

The purpose of this position is to provide a professional engineer capable of performing engineering assignments of medium sized and non-conventional nature in Structural engineering field.

1. As a Project Engineer accomplishes medium sized and non-conventional engineering assignments. Usually utilizes the service of supporting engineering technicians as required by the size of projects. Performs engineering studies, investigations, and designs; completes advance planning and prepares schematic and working drawings on new construction, alteration and major maintenance of facilities, systems and equipment for Nby form contracts, short form and informal contracts for throughout the Fleet Activities, Yokosuka complex, and for all Nby form contracts for all commands in Japan and Okinawa.
2. Reviews designs and drawings for medium sized and non-conventional projects which are prepared by A&E (Architectural and Engineering) contractors, including those of MCON's prepared by the Corps of Engineers, USARJ, for conformance with NAVFAC directives and technical accuracy. Prepares review findings and recommendations for corrective actions or alternative solutions to engineering problems. Compiles technical data for A&E contractors.
3. Performs work involved in preparation of engineering plans and drawings for small sized/conventional projects containing a few complex features in isolated, single units.
4. Performs other related or incidental duties as assigned.
