Task List

This position is located in the Public Works Department, Field Engineering and Acquisition Division (FEAD). The Facilities Engineering and Acquisition Division provides design, contractual procurement and administrative services for U.S. Navy, Marine, and other government appropriated and non-appropriated fund activities. The design and contracts involve construction, repair, maintenance encompassing all engineering disciplines, including safety and environmental requirements. The incumbent coordinates many facets of work with other Engineers and Engineering Technicians responsible for related engineering disciplines to arrive at mutually satisfactory approaches and solutions to technical engineering problems, and independently selects, interprets and applies standard guidelines, while modifying, adapting, and making compromises to meet the requirements of each assigned project. Additionally, the incumbent exercises self-judgment in applying good engineering principles in the design of new construction and repair projects. Reports directly to the Supervisory General Engineer.

A. ENGINEERING DESIGN

1. Performs mechanical engineering design work for medium-sized and non-conventional engineering projects.
2. Performs mechanical engineering design work for small-sized and conventional engineering projects containing complex features in isolated single units.
3. Coordinates the technical design of engineering projects with professional engineers and engineer technicians of other engineering disciplines as required by the size and scope of each project.
4. Conducts engineering studies and investigations.
5. Completes advance planning and prepares schematic and working drawings for new construction, alteration, and major maintenance of facilities, systems, and equipment for formal construction contract award in the FEAD's area of responsibility and other areas throughout Japan.
6. Prepares contract specifications. Ensure that the contract requirements conform to U.S. Codes and Japanese laws, including safety, security and environmental.
7. Develops detailed Independent Government Estimates for designed projects. Thoroughly analyzes project scope to determine the manpower, materials, and equipment necessary to complete the project. Information is critical for the evaluation of contractor bids.
8. Reviews and analyzes contractor's proposed prices and provide evaluation result to the Contracting Officer for acceptability.
9. Review contractor submittals for proposed materials to be used and shop drawings, and provides the Contracting Officer recommendations and comments for approval/disapproval.
10. Leads and assists professional engineers and engineer technicians to prepare instructions, guidelines and technical criteria for their use in developing design, drawing, specification and cost estimate.
11. Performs on-site inspection and survey, and provides technical advice/recommendation to resolve problems encountered under construction based on sound engineering judgment.
12. Performs Heating Ventilation and Air Conditioning (HVAC), plumbing, and industrial machinery/equipment design projects.

B. TECHNICAL REVIEW

1. Serves as a member of Technical Evaluation Boards that establishes technical selection criteria. Upon receipt of contractor proposals, evaluates the proposal against the established criteria to determine which contractor is best qualified to perform the desired work.
2. Reviews designs and drawings for medium-sized and non-conventional projects which have been prepared by Design-Build contractors for technical accuracy and conformance with U.S. Codes, Japanese Law, and NAVFAC Instructions and Directives.
3. Prepares review findings and provides recommendations for corrective action or alternate solutions to technical engineering problems.

C. OTHER ASSIGNED DUTIES

1. Project management data maintenance using NAVFAC e-Applications.
2. Performs other related or incidental duties as assigned.
