Task List

Engineering Technician (Mechanical)

- 1) Originates and develops technical requirements for construction, alteration and replacement of mechanical portions of utilities production and distribution systems in all geographical areas under cognizance of Utilities Department in accordance with Base Master Plan, Capital Improvement Program (CIP), Long Range Maintenance Plan (LRMP), and recommendations of field inspections and surveys. Prepares the technical requirements for incorporation in the GOJ Facilities Improvement Program (JFIP), Military Construction Program (MILCON) and other Specific/Minor projects as appropriate. Coordinates with the Planning & Engineering Departments of NAVFAC and Public Works Team to develop technical documentation and supporting data for the projects. Technical requirements include siting, layout, selection of type of equipment, on-site survey, system routes, and collection, evaluation and calculation of various technical data.
- 2) Reviews engineering study reports, design drawings, specifications and other engineering documents prepared by PACNAVFACENGCOM, DFAB, A&E firms and NAVFAC Engineering Departments for modifications, maintenance and repair of existing facilities, and construction of new facilities with respect to mechanical utilities to insure technical adequacy for operating efficiency, maintainability and suitability to overall system network.
- 3) Works in coordination with the NAVFAC FIP Program Managers and U.S. Army district Engineers in surveillance of construction and installation work to insure that workmanship and materials meet the requirements of specifications, and to provide advice and guidance when difficulties are encountered.
- 4) Provides engineering assistance to division managers of the Department in upgrading and improving the designated mechanical portions of utilities operations by modifying/replacing their equipment/systems under cognizance or the method of operation/maintenance. Also, reviews and assists division managers in identifying O&M staffing requirements.
- 5) Reviews facilities inspection reports submitted by preventive maintenance inspectors, control inspectors, plant foremen and branch/division managers; develops prioritized deficiency lists for corrective actions; prepares work requests together with supporting data and sketches; assists the Facilities Engineering and Maintenance Departments in developing and finalizing job orders, plans and specifications.
- 6) Reviews technical policies, instructions and bulletins from NAVFACENGCOM, NFESC, and other higher Commands for cognizant utility commodities, and responsible for developing NAVFAC FE implementation program.
- 7) Performs other related or incidental duties as assigned.
