MEMORANDUM

From: Commanding Officer, Naval Support Activity South Potomac  
To: All Hands

Subj: ENVIRONMENTAL POLICY STATEMENT

1. Naval Support Activity South Potomac (NSASP) is responsible for efficiently delivering common operating support services to all supported commands located within the fence lines of Naval Support Facility Dahlgren (NSFDL), Naval Support Facility Indian Head (NSFIH), and all other special areas of NSASP. NSASP is dedicated to providing the highest level of mission support and quality of life services for all supported commands at NSASP.

2. NSASP is committed to taking a leadership role in promoting policy and procedures to carry out a successful Environmental Management System (EMS) Program. Our EMS Program incorporates all functions and supported commands so they can maintain environmental compliance, improve environmental quality, and achieve pollution prevention goals. NSASP senior management evaluates the EMS periodically to determine its effectiveness and ensures the established objectives and targets are being met. We strive to **CARE**:

Comply with Regulations  
Always Improve  
Reduce Waste  
Eliminate Pollution

3. We are committed to the following practices for responsible environmental stewardship:

- a. Be environmentally conscious neighbors and strive to protect the environment and public health and safety.
- b. Increase awareness of practices and mission activities that have the potential to significantly impact the environment.
- c. Proactively manage all environmental programs, including improving energy efficiency and water quality and conservation.
- d. Adhere to applicable federal, state, and local environmental regulations and Department of Defense and Navy policies.
- e. Communicate this policy to all installation personnel and to the public to encourage continuous improvement of the EMS.

4. I expect NSASP personnel, whether military, civilian, or contractor, regardless of rank or grade, to be responsible for performing their duties in a manner that protects the environment, prevents pollution, and conserves our natural and cultural resources.
