GeoTracker Webpage  
Steps to find analytical data about Naval Base Point Loma-DFSP Fuel Plume

- Go to <http://www.geotracker.swrcb.ca.gov/>
- Enter 199 Rosecrans Street at Map Cleanup Sites (example below) then click on Search
- A page with a Google map will open
- Zoom in to get a better view of the Northern boundary of NBPL
- Your mouse pointer will appear as a hand while in the map area
- Single click on any of the green colored boxes then a bubble will appear above the respective box that you clicked on.
  - The sites (green boxes) just West (left) of Rosecrans Street, North of Sparks Road and East (right) of Holcomb Road will have the data pertinent to the Fuel Plume.
- Click the hyperlink (underlined description) for the location in the bubble
- A new window will open (example below)

- Select any of the tabs across the top to see information within that specific tab
- The Environmental Data (ESI) tab (circled in example above) will have the analytical data collected. Click on any of the hyperlinks to see the specific data.
