COMMANDER, NAVY REGION NORTHWEST ENVIRONMENTAL POLICY

We are proud of our environmental stewardship and are committed to operating in an environmentally responsible manner where national defense and environmental protection are, and must be, compatible goals.

Our vision is to be recognized as an environmentally friendly neighbor, actively engaged in community outreach, conservation and green purchasing while effectively executing the Navy mission. My policies include integrated support from tenant commands to the installation Commanding Officers to instill a culture of environmental stewardship. In support of this effort, each installation should conduct semi-annual environmental awareness events: one on Earth Day and another 6 months thereafter.

The Chain of Command will identify, document and review environmental objectives and targets and ensure that personnel consider environmental impacts as part of their mission.

We are committed to:

- **C**ompliance with environmental laws and regulations
- **A**wareness and Continual Improvement
- **R**esource Conservation
- **E**nvironmental Protection through Pollution Prevention

M. K. RICH
Rear Admiral, U. S. Navy
Commander, Navy Region Northwest
